

Episode 71 - The gravitational field of a sufi

For 700 years, a single, world-shattering couplet has been deliberately censored from the poetry of Hafez. This episode of RESTART unveils that secret to reveal a truth that redefines the entire cosmos: the creation of the universe was not an act of power, but an act of divine love. As Hafez wrote, "In eternity, the ray of Your beauty emanated... Love appeared and set fire to the entire world." This is the key to a complete reinterpretation of the roles of God, the angels, Satan, and humanity itself.

Discover the ultimate purpose of your existence. We reveal Hafez's most profound secret: God "desired a look, to see in the world His own image," and therefore created Adam (the Perfect Human) to be His **mirror**. In this divine drama, the angels are like eunuchs, incapable of the love required to appreciate God's beauty. Satan is the "uninitiated claimant" who, out of jealousy, insults the reflection in the mirror, not realizing he is insulting God Himself. This episode reveals your true purpose: you were created to be a mirror for the divine. RESTART is here to polish that mirror so you can finally reflect the light you were always meant to hold.

Sixty million downloads of Restart. The Restart program has been downloaded sixty million times. Look at the number of Restart downloads. Based on this, where is the Islamic Republic's cyber army to shut down Telegram? You can't shut it down? Is it yours? Didn't you want people to find out? That it's not yours and you have no power over it. Yeah, Telegram is the safest place. It's beautiful, baby, you didn't know. Imagine you're watching Restart and a religious army commander with a full beard and bushy hair is sitting there, and then I do this. I love it so much. It can't be shut down. The government is scared. Soon you will see the Restart army on the streets of Iran. Just like on Sunday, you suddenly saw one hundred and fifty thousand comments under a BBC post. Welcome to seventy-one, this is what seventy-one does. What will the program do from episode one hundred onwards? It's beautiful, baby, welcome to Restart. Welcome to episode seventy-one. Dear friends on Telegram, don't forget that with every single download on Telegram, the government sinks one meter deeper into regression. They've really tried everything. We've even heard some things from their private meetings and we know. Anyway, fear has gripped the government, and it's logical. Look, the most crucial event in the process of changing a government is to see where the forces are in a chess-like battle. If you are wherever the forces are, you've won the game. What does that mean? It means if you go to Trump's page, Netanyahu's page, and the pages of some world political figures, you'll see the Islamic Republic's cyber army! It's true that there are seven thousand or six thousand people. Because they can't pay them that much! Now, alongside them, the multi-million strong Restart army has attacked, and by God, only one-tenth of one percent of Restart

followers have attacked, leaving tens of thousands of comments under all these pages. We have destroyed them in virtual space. Nobody could have imagined that during this time so many political and non-political people, and doctors have messaged and called me. They say, "Sir, you have destroyed them," meaning you've blown them away. The real Terminators are the Restart followers . We should name Restart "Terminator Four," meaning they attack any page. Artist or non-artist, it didn't matter. They close the comments, and everyone runs away. Why? Because the line between truth and lies is in Restart. And the fact is, in two months, when our power reaches forty, fifty million, if you come and say, "Sir, I'm a Restart listener too," we won't even listen. If an artist wants to become a Restart listener , they must announce it now. They must use their social media pages now. Those who are reformists and think they should have a place in the future must come and support Restart now. The forces that are out there on television and in the media must come out in support of Restart. Behind a program like Restart that truly has over twenty million listeners. This very program, that's why I dedicated the first four or five minutes to political matters, because the difference between "Good Night Iran" and the Restart program is about eight million listeners. Just the difference between these two! And we are giving very strong ultimatums. Right now, people don't know the story of Abu Muslim. You who are sitting up there, you know, so why do you want us to make it an Abu Muslim situation? Why? Why should we do this? Why, beautiful baby? Hand over the government politely and let it be over. Remember, if the people don't know, they should know. The moment Abu Muslim attacked, he finished the generation of the Umayyads. He didn't just finish the Umayyad generation, dear listener, he killed their dogs too. Meaning if they found a house belonging to the Umayyads that had a cat, they would kill the cats too. If Yazid was a guest in someone's house, they went to that house too and killed them too. He said whoever has sat with this man, has associated with him, must be killed. Why do you want it to be this way? The only lineage that survived from the Umayyads, many might know.

The things I'm telling you are because it comes from the people of Sufism and mysticism; you won't find it in history, because you have to flush history down the toilet. History has nothing. History has nothing. Everyone is lying. History is written by the government, like Muawiyah son of Yazid, Yazid's father's name was Muawiyah. He also had a child, Muawiyah. Muawiyah was the son of Yazid who was the only one who survived and was a Restart listener . Yazid himself didn't know his own kid was a Restart listener . That's why I tell you, foreign countries like America, like, I don't know, Israel, France, if they spend millions of dollars, they can't change the brain like Restart does. Meaning, right now it's not clear which bodyguard is a Restart listener and is waiting to receive the order.

Nobody knows anything. The proof is this son of Yazid, Muawiyah, Yazid's son was a Restart listener , and only this family survived; Abu Muslim killed all the rest. So you must be very careful. Very. Another point I must make is that because we have talked about the adherents of the Unity of Being from the beginning, we love all of them. I kiss the hands of all adherents of the Unity of Being, we announced this in Restart from the very beginning. From all the dervishes to the people of interuniversal mysticism. You who are behind the Boroujerdis, even if a cleric is for the Unity of Being, because their number is very small, we defend them. And if television says anything about the adherents of the Unity of Being, first of all, when has the Islamic Republic ever told the truth for it to be telling the truth this time! A few days ago, they spewed

out every lie and deceit and nonsense about poor Taheri; he is an adherent of the Unity of Being and had held some classes that were very useful, it has nothing to do with it...

Right now, I'm explaining our perspective. The adherents of the Unity of Being, anyway, we must have this unity, and all adherents of the Unity of Being must be together. It makes no difference, we must all stand behind one another. They have told so many lies that all of you are lies. Mr. Taheri himself has said a hundred times: "I perform my prayers, I believe in the Imam of the Time. I am a Muslim. I am a Shia." He himself has said it a thousand times. The accusations they make against him, none of them are acceptable. Right now, I don't want to talk about his interrogator. That person himself, I don't want to say what kind of personality he has. I don't want to say anything, but I know that many people know many things. Anyway, never pay attention to the lies of the Islamic Republic. We, as the multi-million group of Restart, defend the Unity of Being.

"Whatever we pass over, the word of the beloved is sweeter."

Three weeks ago, we explained the Realm of Dominion, the Realm of Sovereignty, and the Realm of Power. Only the Perfect Human knows the Realm of Power, and no one knows anything about it except for individual Sufis, the aces of Sufism, who throughout history, with the permission of the Perfect Human, have understood the Realm of Power. Meaning they went into it, dived and swam, and extracted immense concepts and great pearls from it, otherwise, no one knows anything. But they know some things about the Realm of Sovereignty. The reason is very simple and very clear. When you remove time. Then you understand everything. Rumi... this poem has also been completely removed, they have totally decimated Rumi.

This is very interesting for you to know, they have completely decimated it. He says:

"The universe was not, and I was; Adam was not, and I was."

"This moment was not, and I was; I am the creator of the skies."

Sir, how can a person say such a thing? If, for example, four clerics say this, four priests say this, two people say this, we'd say, "Well, don't lie anymore." He says the universe was not. Rumi says I was. They have even distorted this poem. Even these two couplets have been distorted: The universe was not. The cosmos was not, I was. Adam, meaning the very Adam that religions talk about, was not, and I was. This moment, meaning this person that I am speaking as. Rumi says was not, and I was. I am the creator of the Names. I created the skies. How can this be? Jesus says the same thing. How can this be? Araqi says the same thing. How can it be? Shams Tabrizi says the same thing. How can it be? Attar says the same thing. The matter is very simple. The gravitational field of the Perfect Human in each era may emit different forces. Meaning, at one point in an era, it strengthens the intermolecular force. Gravity. Meaning the gravitational spirit of the Perfect Human, when connected, its power is so great that it affects whatever it wants to affect. ... For example, let's speak scientifically. Here, because some people, the father of the father of the father of the father of my and your imbecile ancestor thought that if one day we told him, "Sir, one day it will be possible for me to call my mom on the phone," he would laugh, he would say, "Don't say that, sir, speak scientifically."

"Mr. Hosseini, speak scientifically, don't say it! It's impossible for someone to call his mom from here." Throw superstitions in the trash. If we said, "Dude, I'll take a video of you, I'll watch it later," your father's father's father's father would say, "Don't say that, sir, speak scientifically. Stick to Darwin! Don't talk nonsense, Hosseini, don't say it, sir, what thing from here to there? Don't be so imaginative, don't lie so much. Stick to science." Or to literacy. Literacy is anti-

science... Literacy means anti-science. Look, a cleric means anti-Sufism, a priest means anti-Sufism. Do you understand what this means? It means it's the opposite. It means these cannot coexist in one realm, on one rug. Why? That one comes in the religious law to give people a hard time, to discipline them. In Sufism, only the authorities are disciplined. It's very big, the subject is completely different. Sufism first disciplines itself, then the authorities. This is the same way.

It's scientific. The gravitational field is scientific, my fellow countryman. Meaning, I explained this once. Now is the time to explain it again so that you understand what is inside the Perfect Human. This Realm of Power that we know nothing about, nobody knows anything. Whoever says they know something is lying. Let's see what is inside this gravitational field of the Perfect Human. I will explain the gravitational field of a Sufi. Someone who is around the Perfect Human, you will understand the Perfect Human himself later. The gravitational field of a Sufi, who is just one among the Sufis around the Perfect Human to reach this station, is exactly like a neutron star. In a neutron star... I've explained it before. It's scientific. Fellow countryman, it's scientific, fellow countryman. If we build a fifty-story building on a neutron star, anyone living on the first floor of the neutron star lives for, say, a hundred thousand years.

If he goes to the second floor, meaning he goes up four steps to the second floor, life expectancy there becomes one million years. On the first floor, they live for a hundred thousand years and die. If someone lives on the second floor, he goes up four steps. Four steps, fellow countryman, meaning if we go and build a fifty-story building there. On the second floor, he lives for a million years, on the third floor, it's sixty billion years. If you look at the difference, you'll understand. Meaning if a person... that Albert Einstein thing, now I want to read this. I explained this so you know that the Albert Einstein issue, that we haven't understood the fourth dimension, which is time. That twin paradox, he says one of them goes to some planet, when he returns, two years of his life have passed, he was forty, he becomes forty-two. When he returns to Earth, he sees his brother is dead and his grandchild has come. This is scientific, fellow countryman, it's scientific.

Relativity is scientific. The ratio of a mosquito's life to Hosseini's is scientific. That one lasts for a day, exists, and dies. After a few months, it doesn't see the winter and dies. I'm still here, winter comes, summer goes, winter comes, summer goes. A crow lives longer than me. This is relativity. Now, imagine that on the tenth floor of the neutron star building, one lives for billions and billions of years. Those people up there, all four of them are human. One is on the tenth floor, one is on the fourth floor, one on the second, one on the first. Now imagine... imagine this which is scientific. This Sufi, this neutron star is inside a Sufi. The gravitational power of that neutron star is so high that it changes time. For example, there might be stars that will explode in twenty million years, but you see them now, because the curvature of time... meaning time has caused light to bend severely. The gravitational field has caused light to bend severely. This curvature of time has changed and compressed from one state to another, in such a way that you see your future and for this reason, you see the neutron stars behind you. This is scientific, copy-paste is also scientific. Meaning in fifty years, sixty years, the intermolecular forces... I can copy-paste myself. Do you know what it means to copy-paste myself? Look, I have one soul. My soul is in me but it is not of me. Meaning my body can be copy-pasted. Meaning I can create fifty versions of myself walking around in society. One in Germany, one in

Japan, one in Italy. Sir, can you make copies of our pages? If you had said this fifty years ago, one hundred and fifty years ago, they would have laughed at my beard and yours.

"No way, make copies? What does copy mean, sir?" "Sir, can we put all our family wedding videos of fifty years onto one flash drive?" Yes, now it's possible, before it wasn't. So whatever exists in these worlds, also exists in the next world. For example, have you seen the movie 'Gone with the Wind'? Yes, sir. Have you seen a Western movie? Yes, sir. In the other world when you die, the movies of all the people on Earth are available. That's exactly why. You dear inhabitant of Earth, the Earth has characteristics that allow it to record sound and video. If you were on Mars, it would be very difficult to record your sound and video. Meaning when you die, the Restart followers go to the other side and say, "Sir, can we see Hosseini's movie?" He buys it, pays two dollars and buys Hosseini's movie from the beginning, what the hell he did, where he was born. A feature film. Entertainment!

One of the entertainments is to see what Pharaoh did. They really like it! What did Pharaoh do? I really like, for example, what the ruler of a country like Iran did from the beginning? What tricks did he pull? What did he say to his wife in the room? What did he say outside? Now, the people of Sufism know everything, but you'd like to know too. Your exact movie is there. In fact, one of the entertainments in the other world is the cinema. So, cinema exists in the other world with famous actors. The beloved Michael will sing for you there. Rest assured, he will sing for you, and Hayedeh will sing too. It's all there. Now, what's the difference with now? The difference is this. Right now I have one soul and one physical body. And a girl has a soul and I want to kiss her. Two souls, my spiritual magnetic field and her spiritual magnetic field, there are two walls in front of them. One is her ridiculous physical body, and the other is my ridiculous physical body, which prevents the two souls from kissing each other.

Two bodies kiss each other, you get it? Meaning when two cars crash into each other, the two drivers don't hit each other. Two cars hit each other. Do you get it? That's why you're lucky to survive. In the other world, your body is here, God willing, Hosseini's body is buried. In the other world, only souls are connected. Just see how different a kiss is, just how much a simple kiss differs. A kiss this simple, a mother kissing her child, how different it is on the other side. This method is all scientific.

Araqi says:

"We are so thirsty, and the pure water of union,"

"Has filled the entire world to the brim."

He says union is like a clear water that has filled the world, and we are all thirsty...

"Drowned in water, yet we seek water; we are in union, yet unaware of the union."

...We are like the acceleration of gravity.

Hallaj came and said, "Sir, the acceleration of gravity is like God. It exists even in dung." They took him and killed him. Now scientists have also understood the acceleration of gravity. For example, they now say there is an acceleration of repulsion. It doesn't matter, this acceleration of gravity, or your repulsion! It exists in all creatures. It's in the canary, in the dog, in the cow. It's in everything. This is an example in your love for knowing God. God does not exist in religious books. God is where you would never believe. If you understand the nature of the acceleration of gravity, you will understand God. We keep coming back, coming back to understand. So, that time when Shams threw Mr. Rumi's book into the pond as a story, he was making him understand, not that he threw it into the pond, but he was making him understand that if we take

this book from you, its name is literacy. He explained the difference between literacy and knowledge to Rumi.

"Everything you have is in this book. I throw it in the pond, are you upset? What do you have inside you? Everything that Mr. Rumi has in the book, I also have on my computer, on a flash drive. What do you have within yourself that I can't steal from you? That is called knowledge. What does it mean? It means you have become a Restart listener . The Perfect Human has come, you no longer need a shuttle. You want to see the Earth from the moon, you go and see it easily. They say this is within you, it's not outside anymore. No one can steal it. You can't take anyone on your flight either. It's your own, this is your own essence, this is your own seal, your own fingerprint. This is your fingerprint. I can't go to the bank and put my fingerprint in your place. So, everyone is different. Everyone's fingerprint is different and the space they enter is different."

"Drowned in water, yet we seek water"

"We are in union, yet unaware of the union"

We are in the midst of the acceleration of gravity, looking for the acceleration of gravity. We are in the midst of God, looking for God! We are in the midst of the Perfect Human but I don't know that if he is not there, we are not.

"The sun is inside the house, and we wander aimlessly like a speck of dust."

The sun is in the middle of the house and we, like idiots, are searching for a mere speck.

"The treasure is up our sleeve, and we wander the alleys for a single grain."

There is a treasure in our house, yet we wander outside desperately searching for treasure!

"How long will we stare at the world, how long will we be captive to thought and imagination?"

He explains it beautifully. He says how much we must wander. Staring at the world. Why are you wandering aimlessly in this world? You are a captive of woman and imagination. Do you know what imagination means? Imagination means the telephone was once an imagination.

The speed of imagination, seeing my mom from America to Tehran took eight months. Meaning, in these eight months, I imagine I am going to see my mom. What did I see her with? With imagination. Now with Skype, it's two minutes. The speed of imagination is increasing. Meaning, I, Hosseini, am reaching the speed of imagination. Once, talking to my mom, I was on the road for eight months, I had to go by donkey, if the donkey didn't die. Now my imagination of wanting to talk to my mom has become one second. We've all become foreigners.

We are all foreigners. Even Muhammad doesn't say [his name], he says "Hi Mo." Here they call Muhammad "Mo." So, the speed of imagination, he says how long do we want to be captives of imagination. Remember, supposition and imagination are speeding up. Meaning, a time will come when we can take our bodies from here to our mom and talk together in the middle.

Meaning, borders will disappear, there will be no more prisons. Now, a virtual prison must be created. Meaning, a government must put my soul and my body into a prison. It has already done this, you just haven't noticed. Right now, wherever you have a laptop, computer, and these things, they are listening to you, you are being monitored. Meaning, you are in a layer of prison. Now the world is virtual. That era of someone like Mahatma Gandhi, going to the streets, is over. You change a regime in the virtual world and then you change the regime with physics and mathematics. The world learns from you.

How to change a regime? A very important point.

"O Saqi, a cup from your lip, for I am weary of my own being / Show a sun from your face, so that like a shadow, I may face my demise."

He's saying, show me a little bit of your sun, beautiful one. I am like a shadow, let the shadow disappear. When the sun comes, the shadow goes. The shadow goes to demise. It's not a shadow in the sense that it hits me and a shadow is cast. When the complete sun envelops me, there is no more shadow, that's the meaning.

"So that eternity may be paired with pre-eternity / And our yesterday and tomorrow become all 'now'."

My dear, whatever they say, these are all great people. Whatever they say, either they are liars and we should close their books entirely. Eternity paired with pre-eternity? Is it possible? Big and small paired together? Tall and short become alike? Why does this happen? In relation to Albert Einstein.

He says, he says: "So that eternity may be paired with pre-eternity / Yesterday and tomorrow," meaning when you remove time, it becomes 'now'. So these people, when they became Restart followers, when they found the Perfect Human, something was told to them that you and I don't know. With what was given to them, they practiced and were able to remove time. This is exactly what it's telling you. That's why Hafez says:

"Last night I saw the angels knocking at the tavern door / They kneaded the clay of Adam and shaped it with the wine cup."

He has gone up and stood over them to see what they are doing. He has given them a basin and said, "Gentlemen, it needs more cement, add a little more cement." So why don't religions and governments want you to know this? For me to know. Why don't you want to know that you have forces within you that you can reach? Really, why the power? Right now Restart doesn't belong to any party.

It's not affiliated with any party, nor does it belong to any religion. Why is the government fighting it? Because there are subjects in Sufism and mysticism that if you understand, many things will fall apart. Once we blew up the "Defenders of the Shrine"... The government gathered all the artists to say that the Defenders of the Shrine are very good. How much did this cost? Millions of dollars. Why? Because when a program comes on and several million people, more than twenty million, listen, the Islamic Republic has to spend fifty million times more to tell people one by one, "Sir, this person is lying." Their problem with the Restart program is even this. The hardest time for a regime to be afraid is when it knows that a voice is heard by fifty million, by twenty million, it's finished. The biggest governments in the world will kneel and kiss the big toe of you and me, fellow countryman, bigger than these. We hear the story of Pharaoh and Moses.

Do you want them to tell the story of Moses and Pharaoh again? Yes, a government by the name of Pharaoh called the Ministry of Intelligence. They said, "Sir, a program has been broadcast that performs magic and sorcery. This program's magic is very powerful. They throw a staff called the staff of Moses, and it becomes a dragon. You go and tell the sorcerers to come too." The BBC said, "Don't be afraid, I am the greatest sorcerer, I know how." I've fooled people until now, I know very well what words to use. Some people in America said, "We are with you too. Don't be afraid." The greatest sorcerer came again, five television networks started. Inside Iran, the great sorcerers. Channel one, the first sorcerer, channel two, the second sorcerer, channel three, the third sorcerer. Why do you want to keep going into fantasy, my dear?

"For Rostam was a hero in Sistan / I made him the Rostam of the story."

Know that these stories are not fantasies.

The story you should understand from the story of Moses and Pharaoh now is this. The Ministry of Intelligence, with billions of dollars of Pharaoh's money, tried its best. The sorcerers also came. One said, "Wow, what a movie!" One said, "Wow, it's broadcasting a competition from its channel!" One said, "What a great film!" One said he was lying. Yes, the people so-and-so, one for the sake of so-and-so place, one was pouring the soil of Karbala on people's heads. One was in the well of Jamkaran. One was in another place. Millions of sorcerers. This is the real story. And then the message came, "O Muhammad, release the staff. Do not be afraid." Well, I was scared too. When I started the program, I was scared too. I said, how can you take over the whole country with just two wires? Is this a joke, man! They have billions of dollars, we don't even have two dollars.

How are we going to take over the regime? The command came, "Sir, the beautiful one gave the command, 'Sir, let go of the staff.'" "Sir, where are you letting it go, you idiot?" "Wait, don't be afraid, we've got your back." The dragon team of Restart ate the other dragons. One hundred and fifty thousand comments went into the first dragon, on the BBC, his character was crushed, he went to the bathroom and came out, just gulping water, came to catch his breath and went back in. So, the story of Moses and Pharaoh is this, it is happening now, you just don't pay attention to it, you think it's a fable? No man, they added some flair to this story of Rostam and "I made him the Rostam of the story" so that we learn the lesson now. All this written and journalistic and website and cult news and religion news sorcery and all these people gathered against one program...

All this time when I made a mistake, I revealed [my initial plan on YouTube]. The Islamic Republic shut down YouTube because of Hosseini. Now it will shut down Telegram too because of this Restart program. It's really trying, it has gathered all its elites. Why? Because this program is dangerous. The Restart followers made this program into Restart. These same kids who are working hard now, will also be the future of Iran. They have become our companions. At that time, there were four people. Now look how many millions they have become. This staff is the same staff. This is the Moses that they now call the beautiful one. The Imam of the Time of this era, the Mahdi of this era, the Pole of this era, the Prophet of this era, the Saint of this era, the Elder of this era, the Guide of this era, the Saint of this era, this is the same Moses. Don't joke with him. They didn't understand. It's all in your imagination, you're looking for a story. No, it's not like that. This is reality. "So that eternity may be paired with pre-eternity / And our yesterday and tomorrow become all 'now'." Let's remove time, Araqi says.

To understand the matters in the Realm of Dominion (which is this very universe), the Realm of Sovereignty, and the Realm of Power, and the Realm of Power which belongs to the Perfect Human, we must remove [time], so that you understand a little bit of the Perfect Human, you must remove time. So the first condition to reach the next dimension is to remove time. As long as you have time, you are up in the air. As long as you have religion, you are not a Restart listener . As long as you are without religion, you are not a Restart listener . Because Restart is a completely different path. It's not this path at all. All the people of Sufism and the Sufis could remove time. This is an important secret. Now, how can you remove time? What wormhole of time is there that they are making all these movies about? This is a secret that only in a hidden

place, a person called the Perfect Human gives to people. They have named this religion... Religion means you have to find that beautiful one.

He gives you something that you remove time with!! And then the people of Sufism and Muslims just parrot that phrase. "Prayer is the ascension of the believer". It's saying exactly this. Because you don't understand. It says if you are a believer, meaning you find the Perfect Human, prayer, church, synagogue, whatever, whatever you do. Why? Because blessed are those who are constantly in prayer. Constantly in prayer means he's also drinking tea. Pick up the teapot, put down the teapot, put down the teapot, brew the tea. All of it is in prayer. It's an ascension. Meaning you remove time and go to where you must see. Then you open the eye of the heart, you will see that. You will see what is unseen. The Matrix opens up. You will see what is unseen. "Open the eye of the heart so you may see the soul." In such a state, perhaps I should say... he says. So he is saying exactly: "So that eternity may be paired with pre-eternity / And our yesterday and tomorrow become all 'how'." Meaning yesterday and tomorrow, when we remove time, they go away. Araqi says what happens when you remove time? "In such a state, perhaps I should say," he says in this state where we remove time. I say. "Although it may be impossible for the intellect." Although if I tell Hosseini's father's father's father that we can talk on the phone, he laughs, he says it's impossible. He's saying everything beautifully. He says when a Sufi removes time, forget the Perfect Human for the love of God, think about the Sufi. Man, at least there is something that the mystics, the people of Sufism have said and we can express. It's in the gravitational field of the Sufi. Understanding this is enough. Inside a Sufi, there is a gravitational field that makes a king look like a fly to him. The kings of the world are flies to him. If it flies, he says this is a moth. He says, you see this thing that flies? We want to make it fly? This is a fly, man.

You see we have a naval ship in the sea? He says this is just flotsam and jetsam on the sea. "If you fly in the air, you are but a fly / If you walk on water, you are but a straw / Win a heart, so you may be someone."

The message is explaining exactly this. What? What are you sitting around thinking about for yourself? That Aliabad is a city. Aliabad is not a city anymore, it's a holy shrine, Man!. Aliabad has grown, wherever Restart is. He says in this state I will say something that unfortunately, the intellect doesn't understand. Which intellect? Intellect here means literacy. "That all is He, whatever exists for certain." Certainty, that all is He, whatever exists for certain. The soul and the beloved soul, the heart and the beloved, and the faith... I've brought you back to this same session, again... because this is now talking about the creation of the universe and it's unlocking the secrets of physics, chemistry, and mathematics in a way, and for this reason, we are slowly going together to see what happens.

I haven't said anything of my own, for the love of your mother, don't attribute it to me, whatever there is, is from behind the hypothalamus of the brain of the people of Sufism. I am only pointing. I'm saying, sir, look why this poem has been removed: "The universe was not, and I was. Adam was not, and I was. This moment was not, and I was. I am the creator of the Names." Why should a poem from Rumi that says I am the creator of the universe and the heavens be removed? So we have a secret. We are only opening this secret to know the matter... Let me say this too and finish. Avicenna, dear fellow countryman. This Avicenna lived during the Samanid era. A library.

Avicenna's memory is famous. Every book he read... When a library catches fire, he tells its ruler not to worry, "I have memorized it all." Meaning he had memorized everything. Again, this person from the age of 16 years and 9 months was in love with Aristotle. Meaning the plurality of being. Whatever the people of Sufism said, Mr. Avicenna, nothing can be found from Aristotle.

He's a cleric. He was a government cleric. He has stolen the words. If you tell him "Prayer is the ascension of the believer", what does it mean? He thinks this prayer is the same as bending over and straightening up. He thinks like that. He doesn't find anything in it. He didn't listen until the end of his life until he saw Abu Sa'id Abu'l-Khayr. This man was a god of memory, fellow countryman. At the end of his life, he completely broke away from Aristotle and went towards Plotinus and Plato. He understood that the Unity of Being is correct, and Sufism and mysticism and Restart. At that time he became a Restart listener but they didn't let him play in Sufism. Meaning they didn't make him a Sufi. He thought it was with this godliness of knowledge and literacy. He had a library memorized, Man!, then he came and sat humbly, thinking he would become a Sufi quickly. He thought there was a position and rank here. He didn't know that all the kings of the world are flies in the face of the people of Sufism. A single Sufi. Forget the Perfect Human... and until the end of his life, he died with the longing to become a Sufi, fellow countryman. He did not reach the station of Sufism. But at the end of his life, he became a Restart listener . Read his last books, the answer is clear in all of them. He explained the path and method of the spiritual journey and the path and method of mysticism and everything, and Avicenna also passed away. This great scientist who at the end of his life understood what Restart means. He understood at the end of his life. Now we are sitting here for ourselves, just talking. I wanted you to know that all these great people throughout history, at the core of their perspective, separated themselves from Aristotle and reached Plato, this is their path to progress and victory. I leave you to the gravitational field of a Sufi, my beautiful one, which you enter in the spiritual journey the moment you remove time. The first heaven of your spiritual journey is billions of years different from your second heaven. In the second heaven, you will finally understand that Adam was not, and you were; the universe was not, and you were; this moment was not, and you were. You are the creator of the heavens. You, my fellow countryman. I leave you to the gravitational field within a Sufi; farewell.
