

## Episode 86 - Renaissance, Seed

Welcome to the miracle of the century. Just as the Renaissance shattered the darkness of Europe 1400 years after Christ, a new rebirth is happening 1400 years after Muhammad—and it is called **RESTART**. This episode declares that for millennia, the clergy of every major religion have conspired to suppress true knowledge, replacing the wisdom of Sufis, mystics, and philosophers with superstition.

We reject the false histories written by governments and reveal the truth from the only reliable sources: the great masters like Plato, Pythagoras, and Rumi. Discover the secret history of Prophet Muhammad's **Mab'ath** (prophetic calling), his initiation as a "Restarter" by the unkillable Prophet Jirjis, and the hidden role of the **Complete Human** throughout history.

Finally, we delve into the lost science of **Aziz o-Din Nasafi**, who explained 700 years ago what modern science still cannot grasp: how a child's entire destiny is scientifically determined at four key moments, from conception to birth. Learn why, in the eyes of mysticism, humanity is 3.5 million years less advanced than the common termite. This is not just a program; it is the beginning of a new era of consciousness.

A lot of people are asking why **Restart** is revealing secrets and what the **Complete Human's** goal is in just throwing everything out there for all to see. And why is it being broadcast in the Iranian language? Because 1400 years after Christ, the Renaissance happened, and exactly 1400 years after Muhammad, a new Renaissance is happening in the world. The miracle of the century, Restart! Welcome to episode 86, my friend. Welcome to Pythagoras, Archimedes... no, Ptolemy. Welcome to Socrates and Plato, not Aristotle! Welcome to wisdom, knowledge, and awareness, a new Renaissance, and not to ignorance and stupidity. Welcome to the miracle of the century! Welcome to Restart.

So, welcome to episode 86. The Renaissance era is a period when the Renaissance movement occurs, meaning the **Restart movement** that is happening now, which they used to call the Rebirth era or the principle of Rebirth. Or a return to wisdom and thought, and this Restart is exactly that. If in 500 years, you Iranians who are listening to this program are named as those who created the new Renaissance in the Islamic world, it would not be wrong. Restart is a very new and special Renaissance; this time, **Restart begins from within you**.

At that time, the Christians were screwing the world over and had carried out many massacres, and there were murders, and the Ptolemies and Aristotles were sitting on the throne of power, and along with the rulers, they were killing the Sufis, the mystics, and the wise. This led the **Complete Human** of that time to declare the Renaissance, a Renaissance that led to a cultural revolution and religious reforms. The foolish world of hell and heaven was cast aside. In its place, love emerged from the philosophers, from the Sufis, from the wise. Their writings came out.

This means people finally understood that the democracies they were flailing in were foolish according to Aristotle. And they understood what the Republic of Mr. Plato was saying. Later, Gutenberg and the printing press greatly helped in bringing out the books of the great figures of mysticism and Sufism into the world, and knowledge, science, and art subconsciously ascended. At that exact time, Christians were making life hell for the world, and now Muslims are killing each other like idiots, with childish massacres from ISIS and the Taliban to the most senseless people in the world, who are precisely the Muslims. Now, it's time for a new Renaissance.

The Restart program will soon be broadcast in different languages in Islamic countries. Because of this, you will understand what the essence of religion was and what the perspective of mysticism and Sufism is. And why is it broadcast in the Iranian language? Because Iranians were the great leaders in the history of Sufism and mysticism. Iranians were the great men and women of history, and the greatest number of **Complete Humans** lived and were born in Iran.

So, Renaissance essentially means the period of rebirth. And **Restart** means you have to restart yourself again. This name might have been a semi-coincidence for me, but for this action, it was perfectly correct. Meaning, it's clear that Restart has a concept similar to the Renaissance. So, the name Renaissance will soon change to Restart and to the Restart movement. Back then, it was the Renaissance movement; in that movement, books came out. Now too, slowly, you are realizing, "Oh wow, so Rumi was like this, and Saadi was like that? Oh, so a Sufi is the same as a philosopher?" The names have changed. The **Complete Human** doesn't have the title of Sufi or philosopher. The **Complete Human** is a whole other story. The people around them, like the Archimedeses throughout history, or the Socrateses and Platos throughout history, or the Pythagorases throughout history, or the Rumis, Saadis, and Hafezes throughout history, or the Goethes throughout history—it has no before or after.

Wherever the **Complete Human** has set foot, they have transformed everything. Physics has advanced, math has advanced, chemistry has advanced, science has advanced, art has advanced, and the Shia have been produced. You ask, "Sir, were the Shia produced 1500 years ago?" Yes, the Shia were produced 2500 years ago too. Shia means being around the **Complete Human**; they are called Restartees. Now, they are called Restartees.

The names have changed. At one time, they were called Dervish; in the last 1400 years, they were called Dervish. At one time, they were called monks. The Sufis' name was monk or nun. At one time, before Muhammad ibn Abdullah, their name was Sufi with an "S", like Salman the Persian who was a Sufi, from the Zoroastrian temples. He knew the previous **Complete Human**

and wanted to find the next one. This is also a very important point. At one time, their name was Magi. At one time, they were called Sheikh. For instance, in Saadi's time, no one said Sufi anymore; for the great Saadi, they would say Sheikh Ajal Saadi, the title of Sheikh was given to him. And at one time, they were called the Wise. At one time, they were called philosophers, meaning the wise. All of them have this same concept. Back then, they also called the Magi "the wise." Meaning, one who has nothing of his own and knows that he does not know. Knows that he cannot. He considers himself the most helpless, the most like a dervish. This word dervish means just that. A dervish is one who has nothing of his own. At one time, these became fashionable in history. Then, at one time, they also said mystic. Mysticism means knowing. It means wisdom. Mysticism isn't something where a pigeon comes from above. Like, here comes one mysticism! Mysticism means the more you understand an apple tree—now you've slowly understood what the apple tree comes from, its seed, what its taste is, what's inside it—the more you understand about the apple, your mysticism regarding the apple changes, it increases. This is called mysticism, and Sufism is the path that every being in the universe is on. An apple tree didn't become an apple overnight.

Now, many have said, "Sir, it's the Eid of Mab'ath of Muhammad ibn Abdullah." Give an explanation about this too. I have set aside these few minutes to explain.

Look, Mab'ath means being chosen or resurrected. Mab'ath means that Muhammad ibn Abdullah became Rumi. Muhammad ibn Abdullah became Socrates. What does that mean? It means he was chosen and became a prophet. They told him, "You are a prophet. Now you carry the message. You can explain your message." On behalf of the **Complete Human**, which Muhammad ibn Abdullah himself didn't even know. One day I said that after episode 100, we must explain the history of Islam. The history of Islam begins 1400 years before Muhammad. To understand the subject, we must go back 1400 years before Muhammad to see what was going on to explain the history of Islam. I once explained that when **Complete Humans** are either killed or their bodies die of natural causes, a **Complete Human** emerges in another person a second later. Meaning, someone else becomes the **Complete Human**. So why don't governments kill the **Complete Human** when they find them? Because they are afraid that if they kill them, they will pop up somewhere else where they can no longer find them. Then, in those few years that they can't find them, let's say at least 30 years, the **Complete Human** will produce a thousand more scientists in that time.

That's why, in principle, when they recognize him, the world's governments don't let him grow. They don't. They keep him like the sun behind a cloud. Like the Imam of Time who is behind a cloud. Like a being who is not supposed to be introduced, for them to know him. But they preserve him and control him. Then they tell him, for example, "You live in such-and-such military base." Out of their fear that if he is killed, where will he be revived? This in itself is a very important point. It's not sealed. This itself is one of the very deep points, and the Sufis who are around him and the Restartees who later come to believe and become among the faithful, as you would say, when the **Complete Human's** body leaves this world, they must go and pledge allegiance to the next **Complete Human**. Now, imagine a time when there were no airplanes. Imagine after Shah Nimatullah Wali, who became the **Complete Human** in Iran and was one, and produced one of the greatest mystics and people of Sufism...

Perhaps we can say that Shah Nimatullah produced so many mystics and Sufis that I shouldn't even be saying these things. But the most worthless among them was **Hafez**! Look at what he produced, the most worthless of them was Hafez! Who arrived with great suffering. Yes, well, he arrived anyway. He became the (لسان الغيب). Look at his greatness! The title given to him is the Tongue of the Unseen. Meaning, they said this is the language of the unseen. He knows. He understands the language of the unseen. After Shah Nimatullah Wali, the **Complete Human** went to India. Then the Indians started, and this very Mr. Gandhi is from the roots of one of these Sufis who rose up. Because it's not related to religion... A **Complete Human**... one of the problems we have is that we think the **Complete Human's** religion was, for example, Christian, Zoroastrian, Buddhist! No. Buddhism was a religion that was produced with governments for consumption. Islam is the same way. We see it this way now too. All of these were small stores that were produced later. The **Complete Humans** all have only one religion, only one form, and only one way of thinking. Then it goes to a place where the Iqbal Lahoris emerge from India. Mathematics and physics and still...

Their science and their knowledge, one can essentially say, is because of an Iranian. If we want to speak logically, everything that India has advanced in mathematics, physics, and these things, and in philosophy, thought, and mysticism, can be said to have happened after Shah Nimatullah Wali. The role of the **Complete Human** doesn't always pass from father to son, for us to say, for example, Solomon and David... No, it's not like that. First of all, let me tell you, for example, look, before Pharaoh, the **Complete Human** was killed. After the Pharaoh came, this very Pharaoh of Moses they talk about, during Moses's time, the **Complete Human** was Shu'ayb. In a desert where he was a shepherd, nobody knew. Meaning, by killing the previous **Complete Human**, the next one became Shu'ayb, whom they couldn't find at all. Then in those deserts and in that pasture, he saw two daughters, and then Moses found him.

This is a very important point. So, finding, going, and discovering the next **Complete Human** is necessary. Muhammad ibn Abdullah had the same story, very brief and to the point. Muhammad ibn Abdullah... Right now there are some clues in this Shia and Sunni [divide] that they don't know about. During Muhammad's time, the **Complete Humans** were born in Syria. Meaning, for a while the **Complete Humans** were in Egypt, for a while in Africa. For example, right now, if you ask this clergy, as I told you last time: "Sir, why is Imam Reza black-skinned?" Imam Reza was black-skinned. These people who talk about Imam Reza, what was he? Imam Reza was black-skinned, a dark complexion, his face was actually black, and he was thin. These are questions they can't answer themselves. Or Elijah, son of Amran.

Who was Amran? What was the sheyb Abi Talib? Why Abi Talib? Why not Abi Ali? These are questions that no Muslim, neither Shia nor Sunni, knows the answer to. For example, to make you laugh about the fight between Shia and Sunni, let me tell you this. The third person to have faith in Muhammad son of Abdullah was the sister of **'Umar**!! Meaning the sister of 'Umar, this same 'Umar that these Shias are cursing now, she was the third person. 'Umar son of -Khattab, as these friends say, apparently 'Umar goes to kill his sister for becoming a Restartee, and then he himself converts. These are the questions we must ask: why? We don't know. The **Complete Human** was in Syria. At that time, the father of the father of the father of the father of

Muhammad was a Sufi who was sent by a **Complete Human** in Syria to this desert, a desert named Arabia.

None of them were children of Arabia. This man's name was Ka'b. I explained this once. When Sufi comes, he is commanded that "There is a house there belonging to Zoroaster, you will go and rebuild that house. Fix the water, fix the river a bit, fix the springs a bit, and be there." And he lives there. That's why it's called the Ka'bah, meaning it belongs to Ka'b. The Sufi was sent by the **Complete Human**. Like Ayn al-Quzat Hamadani who rose from India, the **Complete Human** sent him towards Iran. Sufis who were exported to the world, like Shams who were exported. He became a messenger. Shams became a messenger. At that time, Shams's rank was higher than Muhammad ibn Abdullah because he had become a messenger. He was sent to shake someone else up.

This task that Muhammad couldn't do, later was able to do, Shams was able to do. We think that, for example, overnight someone came and the door opened and said: "O Muhammad!" He said: "Yes." He said: "You are Jesus! You are the messenger!" We think it was like that. He said no, man, it wasn't like that. He was just like you. He was like me, he lived. Ka'bah came, it came like this, on and on. Suddenly, the **Complete Human** entered into Abd al-Muttalib. Abd al-Muttalib is the tenth successor to Jesus. Meaning, he entered Arabia. What? Suddenly, the **Complete Human** became Abd al-Muttalib, who was the grandfather of Muhammad ibn Abdullah, whose mother had died, and his father had died too. Muhammad ibn Abdullah grew up in the lap of Abd al-Muttalib. He is eight years old, and Abd al-Muttalib dies. Well, an eight-year-old child doesn't understand anything about a **Complete Human**. This is a very important point. At the age of eight, when Abd al-Muttalib...

...dies, the **Complete Human** gets up and goes to someone else in Syria again. I mean, I want to tell you it's not a monarchy where you think, now that it was Abd al-Muttalib, now his uncle will become it or his father was, for instance, and it became Abd al-Muttalib. It's not like that at all. For example, these **Complete Humans** suddenly go from one country to another country. Then what happens? Muhammad ibn Abdullah is 8 years old. At twelve, this thing I'm about to say is accepted by all Shia and Sunni. All Shia and Sunni accept it, they just don't know the context. At twelve, Abu Talib, meaning Amran—Abu Talib means Amran, his name was Amran. Amran, the father of Ali ibn Abi Talib, as you would say. Amran takes Muhammad's hand and says, "Let's go somewhere." They took him on a journey, near Damascus there was a church, a person lived there. Twelve-year-old Muhammad says, "Why should I go?" This story is also very important because when I tell it now, you'll say, "Aha, so that's how it was."

Abu Talib doesn't even take Muhammad ibn Abdullah straight into that church or that house or that monastery. He tells Muhammad: "Sit under this tree until I come and see if he gives permission for you to come. To become a Restartee? For the dreams you've had?" He says: "Yes." Later, Muhammad ibn Abdullah is taken, and that person sitting there gives some instructions to Muhammad, meaning he has become a Restartee. So Muhammad has dreams, he tells his uncle. Because his uncle has seen these dreams, at this age! He reaches puberty, and he takes him and shows him the **Complete Human**. The name of that **Complete Human** was **Jirjis**. The ones who say Prophet Jirjis, whose picture is now in Russia, in their sports

federation. It's in Georgia too. It's in many other countries. The **Complete Human** at that time gives instructions to Muhammad ibn Abdullah, who then comes, goes to the cave of Hira, and these events happen.

Slowly he becomes a prophet, the Mab'ath begins, and then the year becomes the year of Mab'ath. They say one year after Mab'ath, before Muhammad... these jokes that Shias and Sunnis tell are a comedy. They say that Muhammad ibn Abdullah prayed with Ali ibn Abi Talib and others. Was this the same prayer that you pray? No, it wasn't this prayer. It was another prayer, another form of worship. The prayer law actually came after the Hijra meaning (migration). The Hajj was also like this. The house of Ka'bah, which belonged to Zoroaster and which Ka'b, the great Sufi, came and repaired, they used to perform their own Hajj there. The laws of Hajj and all these things happen in that period but in a different state, form, and appearance. Then Muhammad ibn Abdullah comes, and then Prophet Jirjis, as they say.

The world needs to know who Jirjis is. **Jirjis was a person whom they kill 3-4 or 5 times, and he doesn't die.** One time they set him on fire, he doesn't die. One time they cut him into pieces, he doesn't die. That's why they call him Jirjis. Jirjis, Prophet Jirjis. He was among the miracles; a king lived in that era who used to say, "I give life and I take life." They'd ask, "Really?" He'd say, "Yes, how so?" He would take people and say, "Do you prostrate to this? For example, to this idol?" The person would say no. He'd say: "Cut off his head!" Then the king would say, "See, I took his life?" The next person, "Do you prostrate?" He would say: "Yes." The king would say, "See now, I will spare his life. I won't take his life." Then they bring Jirjis. Jirjis says, "You are too small to take my life." He says, "Oh really?" He says, "Yes." He says, "Kill him." They kill him, he comes back to life.

They cut him into pieces, and he comes back to life. Attar also explains this. Then they turn him to powder, meaning they burn his corpse until it's powder, he comes back to life again. They kept killing him. He kept coming back to life. He would get up. That's why he became Jirjis. He keeps coming back to life, they keep killing him, he keeps coming back to life, they keep killing him, he keeps coming back to life. "Sir, Mr. Hosseini, these things aren't scientific." They're not scientific? Exactly, none of it is scientific. Meaning, it's not literacy, in essence. Like Skype, Skype isn't literacy. It's totally absurd. I'm sitting here and I see my mom's face, it's so ridiculous. How can I see my mom? How does my mom get broken down and come into this thing? Where does she come from for me to see her? It's really not scientific. This is ridiculous. Waves are nonsense, the magnetic field is nonsense. Why don't I fly up into the air from the ground? It's ridiculous!

It has gravitational and repulsive forces. Well, where is the repulsion? "No, we can't show it, but we know it's there." You go and grab the sun's leg, grab the moon's leg, grab the earth's leg too, and let's see where its repulsion came from, how it turned into its gravity. You can't prove it at all. You just can't prove it. Bravo. How do you prove it? Math. We take this pendulum, we swing it. It has to become that from over there. It's not scientific at all. Rotation isn't scientific either. It's just rotation. You've named it the centrifugal force... the forces acting on a rotating body, is that scientific? No. Why should we even revolve around the sun? Why doesn't the earth revolve around your mom? "Well, my mom doesn't have that much gravity. Doesn't have the... stuff."

Yes, bravo... there are things we don't know. A hundred years ago, the people of the world just realized that the people of Sufism, mysticism, and the arch and all those things I explained, that these things are scientific. What does that mean? It means space has no end.

Space... Look, now if anyone in the world says numbers have an end, I'll punch them in the mouth. Why? I'll say, "Count, start from one." He says, one, two, three, four, five. He goes on, living for twenty-five billion years. Forget Noah's lifespan, I'll give you the lifespan of the universe. I say, "Count." Will it end? He says, "No sir, it'll reach several billion, seven hundred and fifty-six billion and so on..." So numbers have no end. It's just like space. So infinity and zero and these things in mathematics that nobody understands, it's because the people of Sufism gave out things for you not to understand. Meaning, for you to know that you don't understand. It's that simple. The most ridiculous thing is Skype. I mean, there's nothing more idiotic than me calling from here and my mom answering on the other side. There is absolutely nothing more ridiculous than this.

How does my mom's voice go over there? "Sir, it goes up, goes into that thing, goes to Verizon. Verizon sends it to the telecommunications over there. The telecommunications there brings it here." The speed of these things... They analyze everything. So can I kill myself and then revive myself? It's scientific. Mr. Hosseini, is this scientific? It is exactly scientific, we just don't understand the subject. So what problem do we have with the world? I've also explained Mab'ath so you'll know that Muhammad ibn Abdullah became a prophet on that date. That's all, it was just announced: "You are a prophet." Later, the **Complete Human** returned to Arabia and then they understood that these are the descendants of Zoroaster. The meaning completely changed. The house of Zoroaster, Abraham built it, the same Zoroaster. This was explained, just like that. It slowly opened up. And then the message came that the **Complete Human** is going to Iran, and he did go to Iran. Meaning, the heart center of the world is Iran.

At that time, it was Syria. During that period and many other things. Now, from episode 100 onwards, we will explain what happened. Many scientific things have become superstitions. Look, anyone... Just so you know, after Ptolemy said the sun revolves around the earth, anyone who opposed this idea was labeled as superstitious. Meaning, scientists, philosophers, professors, they all told him, "Shut your mouth, don't speak superstitions." "The sun really revolves around us." This became a superstition. Later, when mysticism and Sufism came, meaning understanding increased, wisdom increased, people became more like philosophers and Sufis, they realized that, sir, the earth really does revolve around the sun. Meaning, for 900 years, superstition had become science in society. And science had become superstition. Now imagine I'm broadcasting Restart now. Imagine it's that era before the Renaissance, everyone would mock me, everyone would punch me in the mouth, everyone would curse me, everyone would say, "Sir, how is the sun possible? Why are you talking nonsense? The universe revolves around the earth." Well, we wouldn't have been able to broadcast Restart at all. 1400 years after Christ, the Renaissance finally happened. People became more understanding. Just like now, 1400 years after Muhammad, people are slowly, slowly becoming more understanding. The sperm is the same. I said all this because I want to explain this. Look, good boy, scientists really can figure out from astronomy and from the stars what I will become in the future. They can

understand this. This is not superstition. Superstition is when you pick something up and bend over and stand up, that's superstition.

Superstition is when you blow yourself up, thinking houris are waiting on the other side. Superstition is this Bihar al-Anwar that you are reading, that is superstition. Superstition is "Thus spoke Nietzsche, peace be upon him". Superstition isn't related to Islam or Christianity, you know. Superstition is "Thus spoke Nietzsche, peace be upon him." That's superstition. "I heard at the end of his life Nietzsche said there is no God." Shut the hell up! Why are you lying? That's superstition. "Thus spoke al-Sadiq, peace be upon him" That's superstition. "Thus spoke Lenin". That's superstition. "Thus spoke Hitler". That's superstition. Anything that is "thus spoken" is superstition. Anything that is a quotation, that is superstition.

Anything that is feelings and emotions is truth. So feelings and emotions are science. This chatter and gossip is superstition. Who did you hear what from? So if at that time they understood when the sperm of Mr. Moses was being conceived, they understood it scientifically. Your science is weak. Can governments now understand whether they were right back then or not? Yes, all the world's governments can understand how so-and-so who is born, is born. They can understand it with an approximation. Aziz o Din Nasafi... someone whose work on spermatology, 500 years before Mr. Darwin, he put out a work on spermatology that 300 years after this program is broadcast, people will understand. It's that simple. These things exist, go look, even with the distortion of his books, his words are still strange. He says there are four moments for you to understand the subject regarding a child. Meaning it's scientific, not superstition. It's scientific. Number one: The moment the seed falls into the womb. Governments know this too. Meaning the time when you want to have a child, the sperm is supposed to fall into the mother's womb. The date that the sperm falls into the mother's womb. From here, you can understand what this child's profession will be. What this child will become. The stars, astronomy, celestial bodies, universal laws, the...

...magnetic field, gravitational field, intermolecular forces, gravitational acceleration, all of these have an effect on this thing falling in there. That date and second are very important. We have this in science too. Right now, what is science? Go to a basketball court. There's this one hole up there that you throw the ball into, if you throw it anywhere else, it's not in the hole. So you need a force, a power, an amount, a measure, you need to understand  $F=ma$ , to throw it in there so it falls in. So, except on the basketball court, except for that hole, there are no points. Only that hole has points. This is scientific. Now you can't understand this. The falling of tree leaves also has a dance that is scientific. You and I don't understand this harmony. Like that story of malaria and the crocodile and such that I explained in previous Restarts. This is scientific. What the galaxies, the universe is doing at that moment for this sperm to fall, is scientific.

Governments know this science, they just don't want to tell you. Because if they tell you, the subject changes. Then you'll understand when Nelson Mandela is coming, and that's why Pharaoh ordered the massacre, because his astronomers were scientists. You talk as if they were magicians. As soon as you say magician, you imagine someone with a long beard, a broom under his feet, and a big black Halloween hat! No, sir! This is scientific, my dear. It is

scientific. Two: The moment the child's face is formed. Scientists still don't know this. Look, these things I'm telling you, they know the first one, but they don't know the second. The moment the child's face is formed, they know up to a certain point. But how the mitotic divisions happen and it's formed such that fingerprints are different, they don't understand this. They still don't know this. They don't understand what it means. They say, "What does it mean?" He says, "We mixed two apples together, one became a Hosseini apple, one became a Hassani apple. Both are different from each other." Meaning two tastes, two smells, two fingerprints, two feelings, two thoughts. Meaning from one apple, a billion apples are produced, and none of them listen to each other. Each one does its own thing. One goes and makes a fingernail, and another goes and makes an eyelash. This is very simple. This is scientific. This has nothing to do with superstition. Mitosis and meiosis, if you had said this five hundred years ago, they would have laughed at you. Two thousand years ago, they would have laughed at you. Now they say, "Sir, he's right." Meaning one cell divides into two, they are not alike, they don't listen to each other. One becomes like the planet Earth, one becomes like Mars. One goes and makes a fingernail and the heart, one goes and makes the eye and the ear, one goes to make the, I don't know what, membrane, one goes to make the retina, one goes to produce brain cells. It's not clear why at all. How from one thing, two things, and from two things, four things, and the four things are not together, have no connection, have no shared thought, don't listen to each other. They are under the command of another group. Then a boss is produced for them. Meaning each of these cells again has a commander-in-chief. Why? Because when the space between your fingers is filled, the command for suicide is given to the cells, and my and your fingers separate from each other. Otherwise, they would have to be stuck together like a fish's. So it's different in every creature. Meaning, they tell the fish, "Don't you dare kill them." Meaning, "Sir, don't commit suicide, the cells here must be filled between its fingers, it must be webbed like a duck's." To humans, it says, "Kill." Everything is produced from one form. So now you want to have a child, which galaxy is it? Which state do you know? You don't understand what mysticism is at all. You don't understand Sufism. So the way the entire world has children has been the most idiotic way possible. Why? Because they had no knowledge to even have children.

For you to have a child, you need to study astronomy for 189 years, you need to study mathematics for 25,000 years, you need to study celestial bodies for 166,000 years, you need to study cosmology. So humanity will reach a point where it understands these things. This is called mysticism. Meaning it reaches a point where they tell the mother: "Dear mother, you are doing this, don't do that, it's bad for your child." They say: "Dear mother, don't sleep hungry." Your child is a boy. They ask, "How did you know?" They say, "We have a device now, we can see inside your belly." Five hundred years ago, they would have mocked this. It was by chance, either a boy or a girl! They would say God decides if it's a boy or a girl. But before it comes out of the mother's womb, we can determine if it's a boy or a girl. This is called scientific. So now you want to have a child, what do you know at all? When do you want to have a child? When are you going to decide your child's profession? Why do we people of planet Earth, like idiots, not determine our children's profession? So anyone in the world who is unemployed is because of my and your idiocy, my and your ignorance, my and your foolishness. Anyone who steals, it's my and your foolishness. Anyone who oppresses, it's my and your foolishness.

Anyone who does drugs, it's my and your foolishness. You must understand when to bring your child into the world, when to conceive. So it's related, scientifically related! Yes, it's exactly related. We don't know anything about it. We don't know this mysticism and Sufism, our knowledge hasn't advanced that much. We don't know if we should eat an apple with grapes? Or should we have vinegar before conception? We don't know. We don't know if the magnetic field of an apple is stronger or a pear. We don't know. We know nothing. We just have children like this. And 90% of the time, we don't even know when it happened! We don't know. The doctor tells us. "For example, you are two months pregnant." It's a comedy!! Aziz o-Din Nasafi explained this. He says at the moment the sperm falls into the womb, the child's face is formed. We don't know scientifically when that is. It is scientific, but we don't know. The moment an extraterrestrial or terrestrial being—call it whatever you want—enters. Whatever name you give it. A being enters me, meaning it enters the mother's womb, it goes inside.

They call it a soul. You say, 'damn your soul!' . It makes no difference. This being comes inside. The moment this being enters, the child's profession is chosen again. And each time, something different about it is chosen. "Mr. Hosseini, if you're speaking scientifically, can I ask which being in the world understands its child's profession?" The termite. Before the male and female termite kiss, the termite understands what profession its child should have. It's scientific. Meaning when termites want to produce an egg, to have children, the whole country knows that two workers died under Hosseini's semi-truck on the road. These two workers... The first and second children of the termite house are workers. Do you get this? It's scientific. Do you get it? Meaning the urban planning of Sufism and mysticism... that's what they call mysticism. And it's innate knowledge. The name of this science is *laduni*. Meaning, daddy termite, mommy termite, baby termites, doctor termites, driver termites, physicians, engineers, builders, ministers, lawyers, the absolute monarchy of the termite, all of them know how many engineers were crushed under Maradona's leg in a soccer game. They know perfectly well that it went to get something, two termites died there. First: it chooses the gender of its children, whether boy or girl, that's one thing. Two: it also chooses their profession. It says, "Your profession is minister." The child is born a minister and does the work of ministers. Dear listener! And when it becomes a worker, it does the work of workers. Meaning its body is different too. It changes both its body and its soul, meaning its science, its field, its mind, its hypothalamus, and its type of profession. So why don't we in the world know our children's profession? Because we don't know and we are ignorant, period. In mysticism and Sufism, if the people of the world would just kneel and shut up, Sufism would shake the world. Where does the being come from? You don't know anything. Where does it come from? Tell me, where does it come from? Mr. Scientist, you just figured out what Albert Einstein was saying a hundred years ago. You fought against it until a hundred years ago. Until 2016, you were still talking nonsense. I remember, there was a session in this Restart program, I know you were writing comments under it. Just listen. For God's sake, just listen. You're all like this. You say it's still a theory, not a law yet. Now that it's a law, it's beautiful, baby. Now that it's a law, the arch of the universe, the curvature of space, has also been mentioned in mysticism and Sufism. When I was sixteen, I knew something you will never know. How did I know? I stole it too. I committed theft. I was the best thief. I understood. I went and sat and read Saadi to see what he was saying! And I understood, how did you not understand? I read Aziz o-Din Nasafi when I was 23-24 and I understood some things.

They were surprised, "What is he saying?" Why doesn't the world listen? Because the world wants to impose democracy on the world, it doesn't want aristocracy. It doesn't want the people of the world to understand what Mr. Plato said. That's why no one in the world holds a session for a debate between the thinking of Plato and Aristotle. Never. You don't see it on channels outside of Iran, not inside Iran, not in Japanese, not in Italian, not in French, you don't see a discussion where someone sits and says Plato was a mystic and Sufi and scientist and was right, and Aristotle was a son of a bitch. They never allow it. They say, "Sir..." they don't allow anything about Aristotle. They lump them all together, as if it's a truck of apples, and they're all potatoes. As if they went to a grocery store. Third state: Aziz o-Din Nasafi says that at the moment of the child's birth, you can achieve these things, and this is science and has nothing to do with superstition. It's scientific. You need to know that when you drink vinegar with lemon juice your stomach gets sour, it's scientific. "Okay sir, my stomach is sour, what should I eat?" Mint extract, scientific. This one is a base, that one is an acid. It's scientific. Back then, they didn't understand what acid and base were. They'd say, "Drink it, you'll get better." "You'll get better." Then they would be amazed and say, "Glory to the Creator, the power of God." They would go and kiss the feet of the priests, give them money. So the further we go, the more our knowledge increases. He says there's another point. So that time, which is the creation of the face, a time when the sperm falls into the mother's womb, a time when the face is formed. They still don't know, is the face from the mother? Is the face from the father? They still don't know how the face is formed. This itself is interesting! How come I don't look like you? It's important. Look at the faces, why do they become like this? They don't know. Still, nobody knows. So you can only say something to me when you understand or you know. You still don't know anything. You're like me. This is the Restart program, it's not mine, I'm quoting the greats. I'm nobody. Fourth state: From the moment it comes out of the mother's womb, governments, by having people who know this subject—and they always try to keep knowledge under the control of governments so they can devour the people's money—from when you place the sperm in the mother's womb and when it comes out of the mother's womb, they can understand. How do they understand? From astronomy. They look into the universal system, and they see that, sir, a child is being born who is like this. So when Pharaoh ordered the massacre, it was exactly right. The moment of conception, he said, "Look," they themselves say it. He said, "Tonight the conception will happen." So they knew. And when Moses was about to be born, they said, "Sir, tonight Moses will be born. Go and capture them again." But he didn't know the middle part. They know nothing about it. These two points are the points that scientists know now.

Right now the CIA knows, the FBI knows this completely, right now the KGB knows this completely. Completely scientific. That's why, for example, they might not have killed Mahatma Gandhi, because they knew he would change things, change the regime, tear down the structure, and they couldn't do anything about it. If he doesn't want to die, he won't die. And you don't know why. Because behind it, another number is hidden there. Meaning, they are told, "This one will be born, for example, and kill your mother." "Mahatma Gandhi will be born and will crush the British." They say, "Well, what if we kill him?" He says, "Another one will come and crush all of Europe." They say, "No, let him be, let him just screw us over, that's enough. No need for all of Europe..." Its formulas are scientific. That's why if they kill the **Complete Human** now, he'll emerge from another place, come out from another country, and say, "It's me. The

only way to salvation is me." These are things that are clear. I mentioned these four points. I wanted to explain this space to see what things exist, but it was necessary. Well, these are also part of Restart. For us to know. And in the mother's womb and in the father's loins and the dimensions that exist in the universe, we still don't understand anything, not even as much as a termite. We don't understand, we don't understand, you don't understand, they don't understand. We right now don't know as much as a termite. I don't know, you don't know, they don't know, we don't know, you all don't know, and they don't know. Nobody knows, and it is much more advanced than us. 3.5 million years minimum. 3.5 million years, listener! You might say it wrong! Pay attention. For 3.5 million years, termites have been smarter, wiser, and more scientific than humans. Their mysticism is innate. It is within them. My and your mysticism is acquired. Meaning you have to slowly understand that, sir, democracy will screw you over! Dictatorship will screw you over! This person becoming the Guardian Council will screw you over! We have to understand this slowly unless a Restart is broadcast and throws you and me 90 years ahead! In any case, I have said nothing of my own and have spoken from Aziz o-Din Nasafi and the greats of history. Until next week, I entrust you to the inner spirit of the termite house, so that you may know that in the inner spirit of the termite house, the dumbest termite, the most idiotic termite, the most foolish termite, understands thousands of times more than you and I. Farewell
