

Episode 101- The True Night of Power

Well, you are very welcome to the 101st program of Restart. The next program will be "Restart Zero," which will be presented to you. Many dear **Restart Followers** have announced that we should have a program so that those who want to start listening from Program One can have an introduction to the Restart program and, allow me to present to you, know what is going to happen. For this reason, we will add Program Zero before Program One, and we will present a program of perhaps half an hour so you can advertise it in the groups of the Iranian militia members and Iranian revolutionary guards, and present it to friends, acquaintances, enemies, and lovers alike. Our next program is Program Zero of Restart, in which we will provide a concise and useful summary.

Many have called and sent messages in the virtual world asking us to talk about "The Night of Power". Unfortunately, if we want to talk about this... of course, the Night of Power belongs to programs 165 onwards where we must discuss it. But because many of you pressured us to give an explanation regarding this, I will tell you. Regarding the Night of Power, once again, dear Muslims, dear Sunnis, dear Shias, please do not get upset, but the Shia say the night of the 19th, the 21st, or the 23rd of Ramadan is the Night of Power. Allow me to say that the Sunnis say the last ten days are actually the Night of Power; meaning the last ten days of the month of Ramadan. Both Shia and Sunni think this day belongs to them and are very happy because they say this is the day the Quran descended upon the chest of Muhammad son of Abdullah—the Sufi of that era who had not yet become a **Complete Human**.

The Night of Power has nothing to do with Islam at all; it is older than Islam and older than Christianity. The Night of Power is older even than Judaism and Zoroastrianism; it is [as old as] Abraham himself. The antiquity of the Night of Power is even older than the past 108,000 years (meaning the last type of mankind that came to planet Earth). The Night of Power existed something like billions and billions of years before **The material realm** came into existence. Now, why did this Night of Power exist, and what kind of night is it that Muslims say is better than a thousand months not containing the Night of Power? right now, many interpret this "thousand months" in a "Muawiyah-style" interpretation; they say Muawiyah's family ruled for a thousand months, and one night of someone knowing Ali is equal to a thousand months of kingly rule, money, power, position, and the Ministry of Intelligence and such. In other words, they say one Night of Power—a night where you recognize Ali, or technically speaking, a night where you recognize the **Complete Human** of that night—is equal to a thousand months of government, position, money, and status in the universe. They interpret it like this a lot.

But so you know, let us go back to the era of Jesus; we see that Jesus is killed exactly on the Night of Power, meaning the day after the Night of Power he is crucified. Muslims say on the Night of Power we must stay awake until morning; the exact sentence of Jesus to the Apostles is this: "Stay awake until morning tonight." It was the Night of Power. Christians have a Night of Power, Jews have a Night of Power—meaning legally they have a Holy Night, it is in their Holy Night, it is even in their Torah. Moses told them to do a series of tasks, and the Zoroastrians had this too. Zoroaster meaning Abraham. He had this too, and if we go back, we see it exists.

What kind of night is this Night of Power, truly? This itself is a major point. The Night of Power is a night that came into existence in **The material realm**, which we explained in the interpretations within the Restart program, and it gained the concept of Time.

Let's define the atmosphere once more. Let's go back to the previous program, meaning Program 100. In Program 100, we explained that "Hu"—meaning God—came and created (ﷻ); meaning He created a being from Himself that is a drop from the infinite ocean of "Hu" Himself. He named this "Allah." To this Allah—they say the Spirit that... Muslims call it Spirit, many other religions say it too—the name of this Spirit was Ilia. This Ilia created the universe within Ilia, meaning the World of angelic **The material realm**. So "Hu" created "Allah," and named Allah "Ilia." This Ilia, within Ilia, inside Ilia (not before Ilia, not after Ilia, but inside Ilia, in that internal place that you and I do not understand right now—we understand neither 'before' nor 'after', in a place that will be explained in programs 150-160 onwards if there is time), allow me to present to you, The Power of the Divine was created.

So, first, The Power of the Divine was created. After whom? After Ilia. After The Power of the Divine, The material realm was created. Meaning these angels that friends speak of, "computerized beings" were created. Meaning Azrael was created, placed like a virus inside all of mankind, all beings. Michael was created, Israfil was created, etc. Why are their names like this? Religions are naming them this way. A very strong and powerful computerized being that is unimaginable. Meaning, right now you cannot recreate your liver; right now you cannot recreate your kidney, it is made with difficulty. Medically, if we want to make a machine that does the same work as the liver, it's impossible. If we want to make a machine to do the work the brain does, I think you'd have to build a machine of nuts and bolts from here to the entire galaxies just to be able to [replicate] the things you understand—and that's only if you understand 80% of the hidden things of the brain.

Okay, so we explained that all Sufis, when they reach a certain station, announce:

"Last night I saw angels knocking at the tavern door / They kneaded the clay of Adam and cast it into the goblet."

When? When I was there... Why do they say this? Because when the people of Sufism and the Restart Followers go and stand in a certain station and degree, they enter this world of Ilia, the material in which the **Complete Human** exists. The further they go, they understand something else; they go further, they understand something else, they reach a place where Hafiz sees his original place within himself. Meaning he sees a place where he sees, "Oh! This human whose clay they were making in the story of religions, I was present there." Or, "My book, the Divan of Hafiz, was on the leaves and pages of the trees, it was written." And Rumi finds this too, Saadi says the exact same thing, Socrates says exactly the same thing, Plato says exactly the same thing. Meaning all the people of Sufism and Mysticism throughout these 108,000 years of the last mankind say exactly this; meaning they say, "Sir, we saw it," and they are right. Meaning they reach a place where they see. And we gave a very simple example and said: If the Sun says, "The day the clay of the Earth was kneaded, I was present," it has not lied. And if Mars says, "I was present too," it has not lied. The Sun becomes, for example, Shams Tabrizi, Mars

becomes, for example, Rumi. It makes no difference. If the intermolecular force says, "I existed," it has not lied. This is the process that the people of Sufism have spoken of until now.

What kind of night is the Night of Power? It has nothing to do with Islam, where Sunnis and Shias are very happy that they have a Night of Power. The Night of Power is the most dangerous night in human history. The Night of Power is a night where Muslims themselves say a series of universal laws are written in it, but from the Restart perspective, the Night of Power means **upgrading the Complete Human**. His body, meaning **The material realm** of the **Complete Human**, gets upgraded, as does his **The material realm**. What does this mean? It means the entire "Google" is inside the **Complete Human**, but the "Wikipedia" inside Google might have undergone changes at any moment; the latest changes with new software, new Windows, will be entered into the **Complete Human** on the Night of Power. The **Complete Human** is upgraded to the universal subjects that exist. Meaning they insert a flash memory; whatever is in... if Wikipedia has changed, if Google Maps has changed, if Google Images has changed... How many Restart Followers will come into existence? How many Restart Followers will die? Who dies? What happens? What doesn't happen? Where is planet Earth going? Where is the universe going? Will the regime change? Will the regime not change? Everything happens on the Night of Power.

But as for whether you understand the Night of Power? You definitely won't understand. Do I understand? I definitely don't understand. And whether you have ever had a Night of Power or not? It is very ridiculous if you think you have. And with a very simple point, I will bring you proof so you realize that, allow me to present to you, we are completely clueless [literally: "on air"] regarding the Night of Power. Now, in programs 150-160 onwards, I will prove to you scientifically, meaning with physics, what the Night of Power is. What is the issue of this Night of Power anyway? Why must the body of the **Complete Human** be upgraded now, updated? It needs new software; what software should I put in this body? Why does software come into existence in this...?

When the command for disaster came to Abraham for the people of Lot, it was exactly on the Night of Power. The angels who they said came, or the "fairies" as friends say, or the descent of extraterrestrials as Restart says. To blow the people of Lot sky-high [destroy them], exactly when these angels came, it was again the Night of Power; afterwards, no matter how much Abraham cried, "Sir, help, don't do this, forgive them, they made a mistake..." the angels told him, "No, you wanted this to happen." He said, "Why?" They said, "That day, for a split second, it crossed your mind; the moment the thought crossed your mind, the disaster descended." Meaning the same thing we say again in Restart: if it crosses the mind of the **Complete Human**, any second that it crosses his mind that any event should happen in the universe—not just planet Earth—whether you want it or not, it happens.

But let's go to your rituals of the Night of Power. I ask you. I say the rituals of the Night of Power are defined among all Sunnis and Shias and such. Now, especially since Shias exist in Iran right now and they say the night of the 19th, the night of the 21st, and the night of the 23rd—one of these nights is the Night of Power. Remember, Number One: The lunar month is changing. Meaning if the Night of Power falls on a night that has a name or a specific calendar date, then

mathematics, physics, chemistry, and science are all questioned. Why? Because 50 years ago, this Night of Power was not tonight, the 19th. So the Night of Power has nothing to do with the days that are passing. The people of Sufism say, "Every night is the Night of Power, provided there is understanding and wisdom"; provided you understand, every night is the Night of Power. So the Night of Power has nothing to do with the calendar. The proof is very simple; Ramadan sometimes falls in summer, sometimes in winter, let alone the night of the 19th which keeps changing, every time it changes, shifting ten days here and there; so this shows the calendar day is not the criterion.

Number Two: They announce that for the Night of Power, we must definitely perform permateral ritual baths. Well, we explained in Restart that if Jesus went to anyone other than John [the Baptist] for washing... Jesus wouldn't have become anything, no one would have known him either. The reason Jesus became Jesus was that he went to John the Baptizer and took a ritual bath from John. And why is ritual bath important? Because every Restar follower who goes under the water wants to permateral a ritual bath, or for any reason needs to give a command to the water. Who gave him this command? You must be able to change the water crystals. How is he going to give it? Right now, I go and permateral a ritual bath; if I am a Restar follower. I permateral a ritual bath, I give a command to the water, its crystals change, now what I want happens, it must happen. But when people go and wash with water, what do they say to this water? Water from the shower just hits their head and goes! "We make an intention, we permateral a ritual bath..." What are you washing for? What are you changing that you are washing? You put grapes in the sun, they become wine; the sun must be there. The effect of the **Complete Human** must be in it. Meaning when you become a Restar follower, you go to the **Complete Human**, he teaches you something so that when you go to wash, the water changes for you. This is scientific, good boy, this is not a fantasy talk at all. It was fantasy 500 years ago, 200 years ago, up to 120 years ago; now it is scientific, all structures change.

So, one: You permateral a ritual bath. Number One: With what do you wash? With whose permission do you wash? What do you do when a decision is made under the water? Your ritual bath is totally baseless. It says it is better to wash first, now where should you wash?... We are reading all these Shia contents for you. Two: Reciting a two-unit prayer. A prayer that starts with "بسم الله الرحمن الرحيم" (In the name of God, the Beneficent, the Merciful); Which? Which? Which? Which 'In the name of'? Which Allah? "قُلْ هُوَ اللَّهُ أَحَدٌ" (say the God is the one)... We've totally blown it out of the water. So you cannot pray this prayer either. You must pray with the permission of the **Complete Human**. So the Night of Power that you have observed so far in these past few years, allow me to present to you, please tell me, how did you observe this Night of Power? I don't want to judge, I just want to ask... look, I am asking so that you think. I'll go further now; if you don't accept these two, you will be forced to accept the next one. Meaning two plus two equals four; with mathematics, we will prove to you that you must definitely accept that basically whatever Night of Power you have gone to so far—screaming in the mosque, Shout-Shout-Shout, in such and such place *Shout-Shout-Shout*—it is all baseless.

It says recite a two-unit prayer and after the prayer, seventy times... seventy times... if a word has an effect, once is enough. Furthermore, where did you get this seventy from? Who told you this seventy? "Imam Sadiq (Peace be upon him) said"! Where is Sadiq? Where is 'Peace be

upon him'? Where is the sentence? Now, I don't even deal with that... Then it says say seventy times "و اتوب اليه" (Meaning: Forgive me, Allah). The **Complete Human!** (And I turn to Him in repentance). Where is that **Complete Human** to whom you say "forgive me"? To whom are you saying forgive me? You speak to imagination, you speak to speculation, you speak to illusion, you speak to analogy... which Saadi has completely blown out of the water. Saadi says Allah means the **Complete Human**: *"He is beyond imagination, analogy, speculation, and illusion."* No, furthermore, don't think about (Hu), you'll get confused. Now we want to move forward slowly like this. So, it says recite a two-unit prayer. Then—from here you will understand the point with the document I want to bring you—then open the Glorious Quran and place it in front of you. It's over. Please, regarding your Nights of Power, you have Hadith that Muhammad son of Abdullah had the Night of Power just like Moses, Jesus, and Zoroaster. Please tell me, Muhammad hadn't written a Quran, so which Quran did he open and place in front of him? The Quran was written 25 years after Muhammad son of Abdullah. Let's assume this Quran is yours. Okay, excellent, this Quran you stole from the people of Sufism, excellent, it's yours, bon appétit, we accept it, I accept it right now. Please tell me, did Muhammad son of Abdullah throughout his 63 years of life (as you say he was appointed as prophet at 40)—which we know was 39 years and two months—now please tell me, up until that time, throughout 63 years, did he not observe the Night of Power? Yes, Mr. Hosseini. Please tell me, which Quran did he open? Had he written a Quran? After him, Ali son of Talib wrote the Quran 25 years later, so for 25 years Ali was also clueless [baseless] because he had no Quran to open and read from. So the entire Night of Power is baseless. Which Quran must we open?

It says open the Glorious Quran and place it in front of you and read the following prayer. I am your servant, I want to read it tonight too, open this Glorious Quran, I want to read like Muhammad, which Quran should I open? Then place the Quran on your head. Correct, Mr. Hosseini, is this correct? Yes, it is correct. Well, how? There was no Quran for them to put on their heads? Bravo. What Quran must you put on your head? It says then put the Quran on your head and then say "بِحَقِّ هَذَا الْقُرْآنِ" (By the right of *this* Quran). Oh God, by the right of this Quran... My Allah, my God, my **Complete Human**, by the right of "هَذَا الْقُرْآنِ" (by the right of *this* Quran). "هَذَا" means 'this'. The beginning of the Quran says "ذَلِكَ الْكِتَابُ لَا رِبُّ لَهُ، هُدَىٰ لِلْمُتَّقِينَ" (That is the book in which there is no doubt, a guide for the pious). It is a book only for the pious, the Restart kids. It is written at the very beginning of the Quran. You who steal, at least understand some of it. So did Muhammad have a Quran to open in front of him? Why do you open it? Which Quran do you look at? From which Quran do you read? Then what do you do? You put it on your head, "بِكَ يَا اللَّهُ" (By You, O Allah), okay, which Allah? "بِهِ مُحَمَّدٌ" (By Muhammad), "بِهِ عَلَىٰ" (By Ali), "بِهِ فَاطِمَةٍ" (By Fatimah)... So your Night of Power, basically whatever you have observed so far, you must prove to me which Quran Muhammad opened and spoke of. If Muhammad opened a Quran, then Muhammad wrote the Quran; Muhammad wrote a Quran, let's see what this Quran was that he wrote? Where did he write it? Where is that Quran so I can see it, open it, or put it on my head? And if you don't open this Quran and don't put it on your head at all (everyone knows, all Shias are putting it on their heads. Basically, if you don't open it... it is essentially a condition of the people of Sufism... He mocked you; this was the whole point, he basically mocked you. Meaning the people of Sufism and Mysticism basically mocked the

Muslims, the 1.5 billion people. That's why I'm telling you. Why? Because he says open the Quran. Open which Quran? Who had a Quran to open?

These are deep questions that we explained in the programs. Meaning we went and said, "Mr. Rabbi?" He says, "Yes?" We say, "Where do you have the permission to speak? Who told you that you can reach us to God?" He says, "I speak from the Torah." We say, "Well, the Torah was written 250 years after Mr. Moses, which Torah? Did you go to university? How can I become a good person? Come to class, come to the Qom Seminary. Okay, now what should I read? Read the Quran first. The Quran that belongs to... Muhammad didn't write it though. Yes, Muhammad didn't write it. Sir, what business is it of yours? The Quran is the Word of God, check it. Mr. Rabbi, what should I do? You must come and see this course. Go here and shake your head, go there and do such and such interviews... Well, who said this? The Torah. The Torah that, man, every Rabbi has released a Torah, right now we have five hundred Torahs. Not to lie, we have another forty-seven Torahs. Who wrote this Torah? How do we know Moses wrote it?

You, as the people of Sufism say, if they give you a piece of news right now, two seconds later no, two minutes later no, one second later you forget the sentence. I will tell you a piece of news right now, four lines. By God, you will forget. You calculate, he wrote a book, two hundred pages... and anyone who doesn't listen, they give them hell. Basically, the Night of Power must be seen. The people of Sufism say so. You and I understand nothing of the Night of Power. The Night of Power means a Restart follower zeroes the time, and understands. The Night of Power is outside of time, meaning it is outside The material realm, more outer than the World of material, so one cannot think about it. And many other things... which now, in my opinion, it is a comedy to even talk about. I don't know. But on the Night of Power new software comes, new Windows comes, data is given from the universe about who went where, what happens, what will not happen, and the **Complete Human** will be materialized about which regime changes, which person changes, what event happens—he knows it all. Meaning if the Night of Power is the 21st (if it was the 19th, it has passed according to you Shias), meaning right now you know everything. Now the people of Sufism know exactly what day it is, remember, they know beautifully what day it is and who it is, they all know this exactly. But now... meaning even those who are close to Restart Followers know this. But generally, now I fear the day that is tomorrow... So when will the fate of the Iranian regime change be determined? The morning of the Night of Power. May I be a sacrifice for your moon-like face.

That is why we said in the month of June, smile a little and have patience, and that is why we sent the shocking revelation and sprayed our colors, and you showed your courage, you Restart kids; you colored the entrances of all the Iranian militia bases, you showed the power of your voice in the challenge, you wrote "We are Restart Followers" on the palms of your hands, and this same work that they are still continuing, many are writing slogans, they are still spraying colors, they are still doing their work. We did these things so that others know, "Sir, the situation is more dire than you think or we think." In the previous program, we explained that a being exists named Ilia who has no connection to the Messiah [Jesus], but his connection is directly to the Messiah. He has no connection to the Ali bin Abi Talib of the Shias or the (Ilia son of Imran) of Restart, but (Ilia son of Imran) is completely inside him. A being exists, and the name of this

being is Ilia, and before the universe came into existence, he had to come into existence. The reason is scientific, why? Because if a "Hu" exists, this (Hu) that whenever someone understands He exists... Let me give a simple example: Look, dad, right now in your house (Brendrer)—an imaginary name—exists. You say, "No, I don't know what that is." I say, "Okay, (Internet) exists." You say, "Ah, yes, I know, yes." I say, "Very well, give me its password, let me go into it." Two hundred years ago, if we told your mother "waves exist," she would laugh. She would ask, "Waves exist?" We would say, "Yes, there are waves here." She would laugh. This internet that exists right now, you can enter a password and go into it. If "Hu"—meaning the God you speak of—exists, and no one exists to understand this Hu, what difference does it make if He exists or doesn't exist? Meaning if your grandmother two hundred years ago didn't know that the internet and waves exist and these things exist, what difference does it make if waves exist or not? Waves gain meaning scientifically when *I understand* waves exist; when I understood waves exist, the waves have just introduced themselves to me, so I understand a being named 'waves' exists. It's that simple. So when "Hu" decided to create the universe, He had to create a being who would know Him; and if no being knows Him, what difference does it make if He is or isn't? It is scientific. Just as you right now don't know if 'Bangler' (imaginary name) or 'Blerder' (imaginary name) exists or not, it makes no difference. Exactly like "A pigeon comes from up there, a girl comes..." [referencing a folk song], exactly like that. Meaning, something you don't know, what difference does it make if it is or isn't?

For this reason, (Hu) separated a drop from Himself, He named it Ilia. In that drop, He created The Power of the Divine. From Invincibility, He created angelic. Now these are terms, you know. From angelic, He created material. In material, let's say you and I... The World of material can never reach the World of angelic; the World of angelic can reach the World of material. The Power of the Divine... Satan can do nothing in The Power of the Divine. Actually, one of the things you should know about Satan is that the poor guy suffers a lot. Do you know what one of his sufferings is? One of his sufferings is that recently he realized what he himself is totally inside of... And for this reason, if you remember, you who are a Muslim kid, you who are a Christian kid. You heard them say whenever Satan wants to get close to places, shooting stars like meteors... these are cute stories, they are stories. They hit them. They used to say, "Do you see these meteors going? Wow, it hit Satan!" It is a story. Neither is that meteor *that* meteor, nor is that Satan *that* Satan. I want to go inside this being itself. This being was there from the beginning, how did its material change? Ilia means that Spirit, you name it. Whatever you want to name it, whatever you want, for now, we will open it up as we go forward. That Spirit or whatever you name it, this being came into existence in every human named the **Complete Humans**, sequentially. It found another material. Meaning it was born in Jesus, it was something else. It was born in Moses, it was something else.

"As long as the material of the world's connection existed, Ali existed."

Let's read a few minutes of the poem and then leave it for the next program. Now that you mentioned the Night of Power so much, we were forced to give a tiny explanation. We must ask the interpretation from the Sufis, I cannot say anything from myself, let's see what he says. He says:

"As long as the material of the world's connection existed, Ali existed / As long as there was the design of the earth and there was time, Ali existed."

World meaning anything you see in the World of material (**The material realm**). "As long as there was the design of the earth," so you understand. Don't say, "I didn't understand, Hosseini." He says: As long as there was the design of the earth and time, time existed, Ali existed. So since the earth existed and time existed, Ali existed. Why? Because from the material of connection... Which connection? A material existed that was made from that material. It existed. Now why did it exist? This itself is very important. It is interesting to know why it exists. Why a material? What is the reason? Was the reason that "Hu" couldn't do anything? Could Hu not give sustenance and daily bread? The reason for the materialization of this material is very important for us to know. Couldn't he do certain things? Or could He do them but shouldn't have? Or is he doing a job? Or did he have a reason for doing it?

Is Hu like... gravitational acceleration, for example, assume. Gravitational acceleration, for example. Since gravitational acceleration doesn't exist [in a specific way], we have repulsive acceleration—I always said this, 25-26 years ago I was saying this on air too—but now this gravitational acceleration of yours, (Hu) is like gravitational acceleration; gravitational acceleration affects my body atom by atom, but gravitational acceleration cannot stop an oppressor who sticks a knife into someone else's belly. And for this reason, the police were created. You can think of it this way... Meaning (Hu) couldn't go catch the sheep, go put it in the wolf's mouth. Gravitational acceleration—have you ever seen a trip, for example, Mr. Wolf or the sheep? No, it cannot do this work, Mr. Hosseini. Bravo, gravitational acceleration cannot be cut off either. It cannot get upset, it cannot get angry, it cannot get happy. Yes, bravo to Radio Pasto. "Now that it's like this, enemies, we will cut off gravitational acceleration!" If we cut it off, Radio Pasto itself goes up in the air! It has nothing to do with that enemy of ours. If it gets cut off, we are all basically up in the air...

What was the creation of this being for? It is very important. So it shows that gravitational acceleration cannot build a prison, nor can it open the door of a prison. So your freedom, or your imprisonment, has nothing to do with gravitational acceleration. It has a door, it has a lock, it has a gatekeeper; these must be arranged in order. How is it arranged? First, planet Earth must come into existence, oxygen must come into it, the system must change, now mankind must come. Mankind comes with that mankind, this mankind with that mankind comes just like that, they live in groups, the cow eats the donkey, the donkey eats the lion, the lion eats the donkey, swear at that one, this one swears at this one, this atmosphere comes into existence until we reach a place where we understand that gravitational acceleration exists... "Man reaches a place where he sees nothing but God." This exactly shows that all people of Sufism reach a place from a mystical path that you and I do not know yet—we will talk about it later—from a mystical path they reach a place where they find their own position, they find their own fingerprint, and then they keep going to higher ranks, suddenly reaching a place where Rumi Rumi says:

"Attar roamed the seven cities of love / We are still at the turn of a single alley."

Meaning Attar was in a place of Rumi's that he was unaware of; he goes there and sees his place. It's exactly like Indian movies, he says: "Oh brother!" He says: "Yes." He realizes they were brothers!! Then they jump into each other's arms... This is still difficult. So now the questions become very difficult, slowly from Restart 100 everything falls apart. So who married Mary when Jesus was born? Jesus. Everything goes under question. Mr. Hosseini, adultery is forbidden though... In Sharia it is forbidden. In the mystical path what is its definition? In the divine reality what is it at all? Meaning Jesus went with his mother and he himself was born? Yes, is it scientific? One hundred percent.

"That castle-conqueror who took the castle of Khaybar / Tore off [the gate] with one attack and opened it, was Ali."

"That King who was the Guardian and the Successor was Ali / The Sultan of generosity, kindness, and benevolence was Ali."

This has no connection... again I repeat. Ilia son of Imran is also in Ali, I am talking about a Spirit, a being. Rumi is speaking. Now what is the reason? The reason that Ilia was born 1400 years ago... The next verse of Mr. Rumi rejects this theory that Ilia, son of Imran, is the same as Ali. But he says Ilia son of Imran is the same as Ali. Pay attention:

"Both Adam and Seth and Idris and Elias / Both the Prophet Saleh and David were Ali."

This exactly shows that 1400 years ago, a body that was born from Fatimah daughter of Asad, a boy named Ilia son of Imran, who was a very great man too. It has nothing to do with that [specifically]. He says Adam was Ali, Seth was Ali, Idris was Ali, Elijah was Ali, Prophet Saleh was Ali, David was also Ali...

"Both Moses and Jesus and Khidr and Job / Both Joseph and Jonah and Hud were Ali."

Rumi blew all religions out of the water! These contents belong to Rumi. And it has been censored fifty times in the Islamic Republic. Find it in these 700 years. They changed the verses, they used trickery. For example, there it says... there is a place where in these very websites it is written that "The Qibla was Muhammad and Ali was the prostrator"... The poem was so strange that the Islamic Republic came and added Muhammad to it. Whereas the sentence is not this:

"The one prostrated by angels, which became Adam, was because of Ali."

Prostrated by angels... Angels meaning the World of angelic, **The material realm**. Beings that are computerized, they are very strong, very strong. This very computerized being that is like Skype... Right now Skype is a computerized being I created. Right now, I created Skype and it is very computerized and it is everywhere too. Honestly, look at the whole of Skype right now, it is a software; 2 billion or 5 billion people, whoever looks into it, sees his own mother in it... They don't all see my mother. They don't all see my mother, you know! Remember! Whoever wants to call their own mom, talk to her, show a video, everyone sees their own mom in it. Remember. Meaning this being itself is very large that has been created. Now look, those angels that they

are talking about, Gabriel, where everyone is happy saying "I wish Gabriel would come so we can see him"... It is cute that we see him, how would you want to see him? It is very interesting. "The one prostrated by angels, which became Adam." If angels prostrated to Adam and the command came "Prostrate," and Satan said "I will not prostrate," "It was because of Ali."

"The one prostrated by angels, which became Adam, was because of Ali / When Adam became a Qibla and a point of prostration, it was Ali."

They turned Adam into Muhammad in the books of the Ministry of Intelligence and such. No, he says that Adam is correct that he became the Qibla. Why did this Adam become the Qibla? He is explaining his meaning very beautifully. He says when they made Adam, he is using the example of the Muslims' story. He says they made Adam. God (Hu) gave the command to prostrate. So who was Qibla? It was Adam. He explains it beautifully. He says Adam became everyone's Qibla. Just like Mecca where they go and everyone prays towards the Kaaba. When they placed Adam, well, the angels, one was on the left, one north, one south, but they all said this "Prostrate," and they did, except Satan. Who refused. He said, "I will not do it." Why? Because he was not a Prostrators. This itself is an important point. Anyway... we gave the explanations before. "When Adam became a Qibla and a point of prostration, it was Ali." Those angels, if they wanted to prostrate to Adam, they wouldn't have prostrated. To whom did they prostrate? To Ali. These are what Rumi says:

"Both the First and the Last, and the Manifest and the Hidden."

I don't know what else I should say. Really, both the First and the Last. All of time went out the window. He explained it very beautifully. The First and the Now... both the First and the Now. He could have said this, correct. Both the First and the Last. When I say Last, it means it has no time anymore, because the Last hasn't come yet.

"Both the First and the Last, and the Manifest and the Hidden / Both the Worshipper and the Temple and the Worshipped was Ali."

Rumi takes the subject much further, he says basically the Lover and the Beloved are one. They mocked you and me. Meaning I fell in love with myself, I married myself, I produced a child, my child was myself, he married a girl named myself, gave out another child. The subject changed. There is no Lover and Beloved in the middle anymore.

"Moses and the Staff and the White Hand and Prophethood / That which he showed to Pharaoh in Egypt, was Ali."

He says the Staff and the White Hand and Moses...

"Jesus came into existence and spoke instantly / That speech and eloquence that was within him was Ali."

If Jesus did anything, it was by Ali's hand.

"That ring that was on the finger of Prophet Solomon / Was Ali."

"That light of God that was upon him was Ali."

"That proud King who on the Night of Ascension / Was one with Ahmad the Chosen (Muhammad), was Ali."

He says that person who went into the room... His Muhammad was eating food there, he had gone and enjoyed himself and was truly happy he went to Ascension, he went there and realized, who is the host there? He saw it was Ali! Giving him food and paying respect, saying "Please, you are very welcome, you brought serenity, Sir." It's really just this and many other things...

Which, well, is a physics game. You will never understand. I don't understand. You still don't understand Albert Einstein's relativity. This is a physics game that will slowly, gradually be opened up. Maybe in another thirty-forty program we will see what Attar says about this subject. Each of them has their own specific characteristic, each stands on a peak, but they have all passed the minimum universes, passed these bubbles, passed the minimum of the next world, passed the minimum of other worlds too. Mr. Attar passed seventy thousand worlds; these guys all pass the minimum. Meaning the Sufis who are now... A Sufi who is sitting somewhere, he himself is five Rumi's right now. You don't know. And the Sufi himself is Rumi's God. Why? Because if you remember Shams was Rumi's God; he used to say "My Shams and my God." That he exists now, and the Sufis who are around the **Complete Human**, they are all Rumi's God... But they find their position in the **Complete Human**.

So, according to the theory Mr. Rumi is giving, it is beyond these words. We must open up the space of physics and slowly, Quantum, to see what is going on in this Quantum? What things exist that we don't know in mechanics, and in mathematics what things exist where Zero contains everything, yet it is outside of it; and we see One outside of Zero and we see a distance from Zero to One, but One is inside Zero. This itself, mathematically, professors of mathematics get stuck in it. When I tell you "the circle has no end" is baseless, this is it. Meaning One never exists, but you really give me two million money; this is very painful for the people of Sufism that you come and buy my house for two million; neither does Two exist, nor Million, nor House, nor Buying, nor do I sell and you buy. Then you go in there and stretch your legs. This is really very painful, what news is there in this world that exists. Anyway, a being existed named Ilia and the whole universe is connected to this in some way. Let them say the atomic number is written based on Ilia. This Periodic Table of religions and the universe is written within it. Now let's see where the element named Milky Way Galaxy is? Is it an element? Is this a catalyst? Allow me to present to you, is it not an element? Composite materials? Is there something chemical in it? Or not? Thank you for listening to this program, hopefully we go on satellite and something happens, somehow, and if we are supposed to go, let us go, and truly not have these disconnections. Farewell.
