

Episode 102: Program Zero

Welcome to **Episode 102**, also known as "**Program Zero**"—the essential primer designed for new listeners to understand the world of Restart. Be warned: this program acts as a sledgehammer to your inherited beliefs. Through ruthless **Socratic questioning**, we tear down the mental frameworks of religion, superstition, and faithlessness to reconcile you with true **Wisdom (Aql)**.

In this episode, we expose the "Great Theft of History." We argue that Western philosophers and scientists like **Darwin**, **Marx**, and **Hegel** were not originators, but thieves who stole and repackaged the ancient knowledge of Iranian Sufis and Mystics. We reveal why regimes—from the Shah to the Islamic Republic—and foreign powers have systematically censored the works of **Rumi**, **Saadi**, and **Shah Nematollah Vali** to keep the populace asleep.

Discover why the **Complete Human** is the only true guide, why the "Periodic Table of Religions" is the key to decoding history, and why you should never marry someone who doesn't understand Hafez. This is not just a broadcast; it is an antivirus for your soul.

What does Philosopher, Sufi mean? What does Sage mean? What do wisdom and knowledge mean? Truly, why must we find the **Complete Human**? Truly, what is the secret hidden in Restart? Truly, if we are to continue living and not die, what will we see? The science and knowledge from thousands of years ago to thousands of years later are all in a program called Restart. And because you asked that we have a "Restart" program—a program before the main show so that anyone who wants to listen to Restart has a little bit of information—we named this "Program Zero." This is so you dear Restart followers can start your advertising and send it to whoever your heart desires—fanatic or non-fanatic—and know that if... he will certainly strive. Welcome to Zero. Welcome to the **Complete Human**. Welcome to Restart.

**"Let us become Attar's Simurgh, let us become companions to one another,
Let us go to the beginning of love, let us become the healer and the sick."**

Welcome to Program Zero. Before we start the program, let's just give a tiny explanation that not many hours remain until Phase One is finished. What will happen in Phase Two and how many modes it has, we will present to you soon in future programs. No Restart follower, without coordination, will certainly do anything anywhere in the world. And let me tell you, the Special Guard must be aware that if a move is to be made, it will definitely be announced from here. I said this so you are in the loop.

But regarding the things you are doing with your wisdom, like the slogan-writing that has been happening since the beginning, or writing on money, or let me tell you, writing Restart on walls, writing in places where everyone can see and such—there is no problem, it is actually very good. And the sporadic ones... Well, we should essentially say groups of ten and spindles, because they are doing this in tens and sending it to us, not sporadically, but these are no problem. These are wisdoms that you must prepare yourselves with to strengthen and train your wisdom. Because we Restart followers, if we are to fix the future of the country, we must remember to separate from superstitions, religion, and faithlessness. Meaning, we shouldn't listen to the faithless, because the wretches have nothing to say. And we shouldn't listen to the religious, because those wretches too have shown throughout history that they have nothing to present. And governments, by creating "72 Nations"—meaning the faithless and the faithful—have tried to ride on the backs of you and me, and to take away the wisdom and the great inner prophet of our bodies, meaning Reason, and equate us with a donkey. And this is the difference in Restart compared to others.

But those who are hearing this program are those listening to Restart Program Zero and just want to enter Program One. Why did we present this program? Because those who enter into listening to the Restart program, after seven, eight, or ten programs, it's as if a huge fist has hit them in the face; they fall apart and thousands of questions arise in their minds, and they keep wanting to raise these questions, and principally, the questions are repetitive. Because from program ten, they enter program twenty, many questions get answered, but they can't have patience. We are presenting Program Zero so that you, who are listening to this, know where you stand and what you are about to hear. This is a very important point.

Those who are opposed to Restart, you will understand in the future during the Restart program that they are people who we essentially say have a problem with their very sperm... and when we say their sperm has a problem, it is not proof that you should think they aren't human or... well, they aren't human. Let's say they aren't Human in the spiritual sense. You can't say that; that's not what we mean. We say that an apple tree has the sperm of an apple, and a pear tree has the sperm of a pear; this is called fruit. But well, there are many other trees, there are weeds, they are all living. We don't intend to massacre weeds either. But if this weed wants to grow around a Philosopher and a Sufi or around a fruit tree, we are forced to burn it. This is nothing but an act done with wisdom and thought. So, you who are starting the Restart program, be sure that you will fall apart. It's logical. Why?

Because you and I, monkey-like, have—one could essentially say—framed our religious laws and our faithlessness for ourselves. What does that mean? It means we built a building where we pray, we go to the mosque, we yelled, and by dropping tears from inside the eyes onto the cornea, and then letting them drop onto the middle of—let me tell you—our cheeks, we think we are reaching God, and that God is waiting for your crying for Hussein son of Ali or Christ or Moses or others. These beliefs fall apart with the Socratic questioning of Restart. Meaning, we come and tell you: "Your mom isn't your mom!" Well, you fall apart. Then we say, "Your dad has three other wives, you aren't even your dad's child!" You fall apart. Then we say, "You aren't even yourself!" You fall apart again. Meaning, Restart's questions tear you apart.

Another group that has a problem with Restart is the group that has animosity; meaning they know, but they oppose. What is the reason? The reason is that if the people know a subject, their sustenance will certainly be cut off. And the cause of their opposition to hearing Socratic questions in the very beautiful structure of Restart... is that it is dangerous for society. These questions haven't had answers until now. If the name of a Philosopher were to be mentioned right now, my name should be mentioned. Meaning they should say, "Sir, this is the greatest philosopher of Iran." Why? Because I really stole well. Meaning I stole beautiful material and I am explaining it.

"Philosopher," in terms of literature, means wisdom, a rationalist. His Excellency Mr. Dehkhoda also explains that it means wise, learned, wisdom-seeker, knower, scientist. Meaning the word Philosophy means Sage. Then we come and see that, the titles of people we've had throughout history, like Hakim Abul-Qasem Ferdowsi—the word sage means this person is a knower, meaning this is a philosopher. But in the world, unfortunately, the names of people have been introduced with the title of Philosopher just to fool the people of the world again. Or a group stole materials from the past and didn't say where the source was and that "we stole it." Like Darwin.

So why, after listening to this program, will you realize I am a philosopher? Because in the previous conditions, whatever the philosophers said, you understood nothing. And why do I keep saying in this program that "this program is not mine"? To tell you: Look, good boy, good girl, I am not a philosopher; I stole the materials and explained them. And all the philosophers you know were thieves; you named them philosophers. Just like right now, there are many philosophers in the world—meaning they ask Marx, "Sir, are you a Marxist? Is this your school of thought?" He says, "Thank God I am alive to say I am not a Marxist at all!" Meaning, "This thing they are saying is not mine." Hegel is the same. Meaning, by listening to the Restart program, you will understand Nietzsche, you will understand Hegel, you will understand Marx, you will understand Plato, you will understand Socrates, you will understand Pythagoras. You will understand that Ptolemy and Aristotle were with the government and took huge sums of money for distortion. You will understand that during the Shah's time, the books of the Mystics and people of Sufism were censored, and during the Islamic Republic, they were censored too.

You will understand our legitimacy. Because for yourself, instead of thinking you'll be surprised, after listening to a few Restart programs, you actually *will* grow horns! Meaning you say, "Is it possible? Well, why should they censor Saadi?" You are totally astonished. You know what it's like? It's like censoring Barbari bread (a type of Iranian bread). like censoring the air. You say, "But this air is necessary for my body, why do you censor it?" What profit does the Islamic Republic gain by putting tens of thousands of people in the virtual world, Instagram and Telegram and on the internet and Google, and spending billions of dollars to censor Saadi? Why censor Saadi? Saadi isn't fighting with the Islamic Republic. And after a while of listening to the Restart program, you realize the Islamic Republic came *specifically* so that Saadi would go!

Then you understand why the Shah censored the poems of Shah Nimatullah Wali? Why was this happening during the last twenty years of the Shah? Why did everything Reza Shah started to fix regarding books get messed up by his son? He ruined it? You will understand the

presence of the Russians and the British in this country, and in Restart we didn't just talk, we proved it. Meaning we proved it was censored. Madam, Sir, who is listening to Program Zero and wants to enter One, whatever we said, we proved. Meaning the listener of the Restart program got up, went to the internet, searched Shah Nimatullah Wali, then saw the whole poem is censored, and then saw that five hundred, five thousand Islamic Republic sites have posted this poem, but censored and to their own benefit.

Well, if you have one percent—you don't even need to be a very smart person—if you have one percent intelligence, after listening to the program, your first question is: Why do they censor these? Why must Saadi be censored? Why must Rumi be censored? Why must Hafez be censored? Which couplets must be censored? What did he say in this couplet that it must be censored? Look, good boy, look, look at your very self. If you really put one percent consciousness, one percent understanding into this program, after this program you are a philosopher. Meaning all Restart followers are now philosophers, at program one hundred. That's why they scream/cheer. You think, "No, for example, they are crazy," or you think, for example, "They are unstable." He is a Doctor of Mathematics, he studied pure mathematics, he studied pure physics, he is a villager. He takes the sheep there in the morning, has downloaded it, and is listening.

Every class of people is there, go into the universities and see how it is. Do you think Restart followers were that stupid? Are they like you? To be stupid enough to be an imitator of a mullah? No, Restart followers are smart. Actually, their intelligence and wisdom and understanding forced them to listen to this program. Meaning if someone doesn't listen to Restart, you should doubt their wisdom and understanding. And someone said, "Sir, if we go and marry boys and girls, marry Restart followers... if a girl has listened to Restart and doesn't understand, let her not understand." Don't doubt it at all, be sure she is questionable. She cannot give you anything in the future. Why are you getting married anyway? Man, two people, in a room, in a car, on a trip, you fight five hundred times. Two friends... then how do you choose a woman that you have to tolerate for fifty years? She doesn't listen, doesn't talk, doesn't understand what Hafez says. What kind of child do you want to produce?

You right now, you never mix crappy water, tap water, with good water. Sweet water, salty water, that Rumi and these guys keep talking about—this is it. Meaning you wouldn't get up right now and mix the water you bought for seven dollars, five dollars, three dollars with tap water. You say, "I bought this to drink, so I wouldn't drink that." How do you take a wife who understands nothing, and you mix this salty and sweet water, and pop out an idiot child? That's why... yes, if she really reaches this understanding. A girl who understands Hafez will certainly understand you. Now, if she gives you two swear words because of Hafez, forgive her. It has meaning. You know you have a belief, a future. You say, "This wife of mine nags twice, but at least she understands Hafez, my child will turn out to be something proper." And this is the criterion.

Well, so in this program, when you enter, your wisdom gets shaken, it makes you nervous, you get upset, you get confused, you get confused by the censorship—confused by the censorship throughout history—then you see what these guys say and what that guy says, and

gradually as you listen to Restart, your questions get answered. Great secrets are illuminated in Restart, and then the hands of religions and the faithless and the rulers are revealed, and slowly, slowly you find "Believe" in Restart and you believe in Restart. Then the reason for the massacre of the Sufis transforms you. Then we see that you heard a story called Socrates, you know a name called Socrates and you know he was killed, but you don't know why he was killed. And then you understand why Plato had to spend his precious time writing down Socrates' thoughts and say, "Sir, this program is not mine, do not name me a Philosopher, I stole this program, I am expressing Socrates' thoughts." Later you will understand why Rumi comes and says "My Shams and my God." You will understand these gradually.

You will understand Attar's position in the Restart program. You will understand that you have people whose books are forbidden to read; their wisdom, understanding, and consciousness are so far apart from you and me. You won't reach this running race anymore; you jump and you stay stunned. And that is where Rumi says:

"Attar roamed the Seven Cities of Love, We are still at the turn of a single alley."

You will understand this. In the Restart program, you will understand why you must fast, why you must not. The ways to reach God are not through money. This is something religions make you understand incorrectly. Meaning, it is not an mysticism class. Meaning I cannot create an mysticism class for Restart right now for you to go learn something from someone. The number of Knowers, Wise Ones, Sages, Philosophers, and Sufis in the world is so few that they cannot open classes.

So, you cannot understand mysticism and - Sufism through a class. In this Restart, you understand that mysticism, -, Sufi, Philosopher are all one group. They are a group who are Believers in the Unity of being who have found a being named the **Complete Human**. So, you will understand the secret of the **Complete Human** in the Restart program as you go forward and listen. Then you understand that in every era, a human existed, the name of that human was the **Complete Human**, and all poems and mystics, Sufis, Philosophers, the Wise, the Wisdom-Seekers always spoke about this person, and made poetry about the eyes, eyebrows, ears, lips, and mouth of this person. And not that, as these mullahs say: Rumi drank moonshine and Hafez was after booze and girls and such. And you will understand this.

You will understand the difference between a Prophet, a Guardian, a Successor, and a Messenger in this program. In this program, you slowly understand how the universe was formed. Meaning you fall ahead of scientists by about 400 to 500 years in this program. Why? Because the shapes and forms scientists are explaining have always been hypotheses; it has all changed. But when scientists now, in this age, understand that the Universe implies a world where there are billions of billions of Universes within it, they conclude to have faith in the words of His Excellency Shah Nimatullah Wali. In this program, you understand that Darwin, before a person named Darwin came, five hundred years prior, the great Iranian Aziz o Din Nasafi gave Darwin's theory beautifully. And why couldn't Darwin complete his theory? Because he stole the book and put it in his own name.

In this program, you understand that Hegel, let me tell you, Marx and many German philosophers and other philosophers stole the materials. Meaning the line:

"If you split the heart of every atom, you will see a sun in its center."

They took this and put it in their own name, their name became Philosopher. Meaning they were very good thieves. You will understand in this program.

"All the particles of the world, in secret, Speak to you, day and night: 'We are hearing, and seeing, and aware, With you strangers, we are silent.'"

In this program, you understand that the entire thoughts of Rumi, Saadi, and Hafez, Saghir Isfahani, Khwaju Kermani, and many greats, Hatef, and many greats were stolen by other people in other countries. Then you become sad after continuing this program and then you say: "I wish they had taken my soil, I wish they had destroyed my cities, I wish they had killed my people—but they sold our books!"

Meaning for three hundred, four hundred, five hundred years, they started—the Oxford universities that existed in Nishapur and Shahrud and in places all over Iran—they took the books of these Philosophers and Sufis, and the governments, without having any prejudice over this, handed them over to England and other countries. They took the books, read them, and stole them. Now someone like Darwin, his honor goes up in the air; they can't finish his theory. Scientists are sitting like goats, staring blankly, they don't know what to do with it. It's a theory that is correct but wrong; they don't know what the end of it is. Why? Because they can't find the original book of Aziz O Din Nasafi. In this program, you slowly understand these things and understand that philosophers are divided into two categories: Philosophers who came from the side of the **Complete Human** and from the side of God, and revelation is upon them and their words are proof, such as Plato and Galen and Socrates and Saadi and Hafez and Ferdowsi and Khayyam and BabaTahir and so on... And philosophers who came from the side of governments with money, like Aristotle and Ptolemy and other philosophers who studied right now in England, who set up Rumi interpretations for you and tell you nothing of Rumi. Meaning they don't tell you the important secrets of Rumi and tell you secrets that are of no use to you at all. You will understand in this program.

In this program, you will understand the definition of Zero, and you understand why the Sufi who placed Zero on the number axis placed it there. In this program, the dimensions of time—dimensions of time meaning the fourth dimension—you will just essentially understand; in this program, you will understand the dimensions of the universe, you will understand the dimension of death. This program takes you so much into your mother's womb and to after your mother's womb and after your dying that all secrets will be revealed to you. You must tolerate it; you must not get angry. Why? Because your beliefs, fully—like an antivirus entering your body—it kills the internal filth viruses of yours; for that very reason, you fall apart. And since "breaking a habit causes illness" as Saadi says, unfortunately, you think you are ill, but after a while of continuing the program, you realize, "Oh My God," the secrets are far beyond these words.

The documents that are in these books are documents from the Greats. What does that mean? It means, look right now, who do we talk about in Restart? We are talking about Rumi. Who does the mullah talk about? Who is the mullah who is talking? In this program, in one of these programs, I explained. An Iranian militia member said, "Sir, you say you rely on Rumi, on Rumi's book, and the mullahs are also relying on narrations, which one should I choose?" I said, "It is exactly like wanting to choose between your mom and a goat... It is completely un-choosable." The proofs we are bringing are from the Greats whom the world has approved; the documents you bring are from the mullah on your street corner in a mosque. Then Allameh Majlesi—in "Good Night Iran" we explained—the books they wrote... Allameh Majlesi with his entire clan couldn't have put out that many books that he put out. What does that mean? It means the documents you go there and scream for... Good boy, dear Iranian militia member, dear Iranian revolutionary guards, they are documents from a mullah. This person isn't valid at all, his name isn't there. Like the martyrs... now if the "Defenders of the Shrine" martyrs are really important people, where is this cemetery of Nader Shah's martyrs? He says, "Mr. Hosseini, we don't know." These two hundred thousand martyrs who died in Nader Shah's wars in the name of God, aren't they martyrs? Where are their graves? I want to go and pray. He says, "Sir, except for Nader Shah, there is no one, their graves aren't there." Because they are donkey fucked-martyr, and this we have explained in the Restart program through the thoughts of Rumi, who explains the "donkey fucked-martyr."

So our documents are from people, each of whom is a Universe of credibility. Meaning Hafez—when Goethe hears Hafez's name, the German philosopher, when he hears Hafez's name, he has no path but silence, but bellowing, but screaming, and he puts out a book named (*West-Eastern Diwan*) regarding Hafez. Well, this is a document. Philosophers and Sufis have announced themselves throughout history, and confirmed the next ones, the others. Meaning Mr. Rumi says: "O my Plato, O my Galen," "My Shams and my God." He is bringing names in it. Meaning Goethe says "Hafez is my God." Well, it is clear who he is influenced by... Well, it is clear that the mysticism Goethe is expressing—if you are German and read Goethe's book, you will definitely arrive at Hafez.

You will definitely arrive, simply. Like His Excellency Mr. Hegel and Engels and I don't know... Marx and these guys... What did they say? They spoke of the material world; they explained Rumi and Saadi and these guys. Everyone is screaming "Bravo, Bravo." There is a poem that contains all their words... for example, if you read it, it is very interesting to know that a poem, we read it in Restart, says:

"It is nothing and there is nothing except His Oneness, There is no god but He."

Which we explained means, "Sir, God exists in every single particle of beings." This poem and these stories belong to, for example, a thousand years ago, and Hegel and these guys also say, "God is the God of Wisdom, He exists in every single particle." It's like this. Now they are stating the material version of it, or for example contradictory talks and these words and such. They took all these words from Socrates and are explaining them but they don't state the source. In Restart, One: You must listen to it in order from the beginning.

Two: Each one is correct, it is 45 minutes, 50 minutes, and it is true that thirty-forty million have heard it, but each of these Restart programs is a lesson from the hidden and concealed thoughts expressed by the Greats of the Universe, and not a Rabbi or Priest or others. In Restart programs, we explained that if someone doesn't know Mendeleev and his table, they should go ask these Physics and Chemistry and Math kids once, ask their son or daughter who has this information, to explain to their mother and father for ten minutes that the number on Mendeleev's periodic table comes and discovers a secret between elements and finds the position of the elements. And we came and opened the Periodic Table of Religions; meaning we said, "Sir, religions have a secret that you are not in the loop about."

And with very simple questions in the Restart program, we challenge these people and we unlock the secrets one by one for you ourselves. Meaning we ask the question and answer the question in future programs, and you slowly realize this. For example, we say to a priest, "Mr. Pope," he says "Go ahead," Mr. Cardinal says "Go ahead." We say, "You are showing the path of religion, where are you showing it from?" He says, "From the Gospel." We say, "Okay, so anyone who comes to you, goes and sits in this room and reads the Gospel book and such, will they understand the Gospel and understand the path of religion?" He says, "Yes." We say, "Well, can we ask a question?" He says, "Go ahead." Bravo for asking, it's always like this. Like these godless people who had picked up Nietzsche... Now since Restart has been broadcast, Nietzsche came into Sufism too. Everything of theirs has fallen apart; they have nothing left to broadcast in the virtual world. Nietzsche... as Nietzsche said... Nietzsche used to say such-and-such, then they realized Superman, Nietzsche was talking about the **Complete Human**; he put out *Thus Spoke Zarathustra*, and Zarathustra is that same Abraham, and many other things. Well, it is very agonizing for the wretches, they don't know what to post now. We say, "Well, Mr. Pope," he says "Go ahead?" Our question to you is, who do you consider Jesus to be? He says, "Son of God." Some of them say "God Himself," some of them say "We have no prophet greater than Jesus." We say, "What is the path to salvation?" He says, "Jesus." We say, "What else?" He says, "The Cross." We say, "Okay, we accept all your words." He says, "Go ahead." I say, "Our question to you is, in your opinion, did Jesus have mental/spiritual problems brain-wise?" He says, "No." We say, "Do you accept he was an understanding/wise person?" We say, "Yes." We say, "Why didn't Jesus write the Gospel book himself?" He falls silent! We say, "Why did the book come out two hundred years after Jesus?" Meaning a prophet from God, or the Son of God—when he is the Son of God or God Himself, it's even worse—meaning he didn't understand enough... The Son of God, Jesus is the Son of God, came and didn't have enough consciousness to write the Gospel himself? To say, "Sir, write this and give it to the people"? If the path of salvation is the Gospel book, why was it written two hundred years after Jesus? And why did 500 Gospels come out?

Here they say, "Shut your mouth!" They order it as a decree, or they execute you, or kill you, or give you the cup of poison, or they don't let your voice be broadcast—like the BBC doesn't let the voice of Restart be broadcast. And we proved it. Meaning the BBC, a hundred thousand Restart kids left messages on the BBC, which you think speaks important words, and they said, they begged him, "Sir, please do a favor and report on Restart." It officially announced that "These words are basically a joke, we talk about everything *except* Restart!" Because if Restart is broadcast, we can no longer govern. We cannot remove the Islamic Republic and put another

idiot in charge of you idiots. And as long as the people are idiots, we are profiting. Restart wants people to move from the "Delegation of Idiots" into the "Delegation of Scholars"; we won't do this. And we have proof, meaning it is proven. We took photos and posted them. Three hundred thousand comments went to this artist, went to that virtual page, went to that radio page, to those networks, they went everywhere. The Restart kids are smart. They went everywhere, they left a footprint of themselves everywhere. The Priests say, and we have heard the narrations: "Mother of Petros—peace be upon him—said!" We say, "Mother of Petros?" Jesus himself didn't understand enough to put out the Gospel, what did the Mother of Petros understand? They say, "No, she had a dream." We say, "Well, bring her, let's see what dream she had?" Marx came in the middle of a news agency and spoke, as the saying goes, Marx was divided into two parts: "Old Marx," "Young Marx." They said these are the Youths of Marx whose understanding is of wisdom and they are Leftists. And these are Marxists who are Traditional Right. Then they ask him, "Marxist..." and he says, "I thank God I am alive right now to say I am not a Marxist at all." Before your eyes, they took Mr. Khomeini's books and censored them. Ninety percent of Khomeini's books are censored... Khomeini, this very Khomeini. Man, this is just in the past few years.

What do you want to rely on to cite as proof? And let's see what Nanny Petros said? Then she had a dream? Well, I, I can have a dream too, everyone can have a dream and put out a book. My grandmother also had a dream that "Any mullah who is alive, dust on the head of the Iranian nation, shame on them." Said Grandmother of Hosseini, Send blessings! Plus Hosseini, by God, you listen to this Restart a lot, his words are acceptable. Meaning you accept... So I can too, I can put out a hearsay. And I wish Christians would fall short and throw in the towel against Restart. It's not like that, by God, it gets worse than this. Meaning when you listen to Restarts, you put all the Christians aside, and then next to these Christians, you place the Muslims too. Because then we come and ask the Muslim, "Where did your narration come from?" He says, "Sadegh said." We say, "Sadegh says he is not Sadegh, but Sadegh said!" We say, "Who did he tell?" He says, "To Hassan son of Qal!" Who is Qal? We don't know who Qal is.

But the rest say he was a good man; it's all narration, it's all imagination. Then who did he tell? To Muhammad son of Valegh. Who did Valegh say to? To Alegh. Alegh to Salegh, Salegh to Nalegh, it reached us... It's very ridiculous. Man, if ten people stand in the street and pass a snowball hand to hand, the last person will have no snowball left in their hand. Right now, if I tell you 25 sentences from this room, and say "Go to the next room and in less than a second tell your mother," you will change my sentences in 500 places, you will forget. Then 1400 years ago, 2000 something years ago, "Mother of Petros—peace be upon him—Said!!"

The religion that religions introduce to you says He said. The religion that Restart speaks of says "I am saying now," *now*. We have questions in the present tense, *now*. He said, "Forget it, *who* said?" And its documents come from Rumi and Saadi and Hafez and the Greats of history. When we place Muslims next to Christians, do the Jews smile? We ask the same question again. We say, "Sir," he says "Go ahead." We say, "Moses—we can imply Jesus didn't do much important work, he revived two dead people, I'm his servant. Moses who dropped a cane and it became a dragon, couldn't he drop a book? For a hundred thousand books to come out? By now the Torah should have at least a hundred thousand copies out. Where is Moses'

handwriting in the Torah? The Torah is written 257 years after His Excellency Mr. Moses; the first Torah comes out.

The Rabbis say, "Don't talk about the Torah, the Torah is a heavenly book belonging to God and whoever opposes the Torah is a naughty, he must be killed." And killing—not that they just spoke, they actually killed. Go to the Middle Ages, see the Christians killed everyone, (Hypatia)—one of the Sufi ladies of history—they killed her, skinned her, killed her. Mary was the same, others were the same. "Mary Said?" What "Said"? Where is the "Said"? What do they rely on? On a book that Moses himself didn't write, compatriot. Zoroastrians know it themselves; in the middle of the Sassanid era, first Alexander took a book of theirs, he took a book with seventy percent censorship, they know it themselves, they know everything themselves. In the middle of the Sassanids, another book... the Magi sat down and wrote it, the cute Zoroastrian priests sat down and wrote it. They know it themselves. They say, "This is the word of God." Look, and how do you accept it? Why you have a mental problem, I don't know. Look, I... all ophthalmology specialists say "Sir, don't stick a rod in your eye," you say "No, the mullah at the corner mosque said if you do it, it's no problem, for Hussein." You do it and you go blind. "No, our neighbor said eat this pill." We say, "Sir, the doctors of the world say we shouldn't do this," "Yes, yes, yes, they are great people, but our neighbor said eat it, so..." And with very simple questions. You simply realize that the Book and Tradition and Narrations are all things that reach the hands of some people. First of all, they all looked like these mullahs anyway, why do you think they were something extraordinary? That one who said "Sadegh said" and said "Lagher and Lagher to Sagher, Sagher to Dagher" reached this one... this one looked like him too. So no religion answered any Restart question, and its proof is available until now. None, none of them can answer these questions. And Restart is a program that makes you alert, wakes you up, shakes your wisdom, and you must listen in order and come forward and realize, see where real religion is from and where it goes. The legitimacy of this program... Its sign is the censorships of the Greats of Sufism and mysticism and Sages, Philosophers—who are all names for one person—and the billions of dollars of money that was spent and the time they put in and the killing and these... all things that existed in history and its documents are available, and our document is from the most valid humans, which has been presented to you in the Restart program. Many examples are given in Restart, such as: What is a good deed? What is a bad deed? Can you help? Can't you? Why is a person who raped people's wives and children, because he has money and pays for prayers to be read for him, and because he has money he goes and pays to build a mosque—how does he go to Heaven? So money takes you to Heaven. Meaning these very monies take you to Heaven again. This is the entirety of the theories that are rejected in Restart and proven to you scientifically, and the names are clear in it, like Malek o-Sho'ara Bahar, who considers Saadi a prophet. These are prophets who exist throughout history. Another secret opens in the Restart program in the future called the **Complete Human** and we see that for several hundred thousand years the Last Human existed; from 108,000 years ago until now, and several ten thousand years too, this Last Human has been emphasizing this, and there is no Iranian or foreigner distinction. Their words are all similar and their words are all one sentence, and that is:

"I look at the desert, I see You in the desert, I look at the sea (Complete Human), I see You in the sea, Wherever I look, mountain and door and plain, I see signs of Your graceful stature."

At the beginning of the Restart program, I cursed a little bit too, and the reason for it was very... Well whatever the reason was that it came... whatever came out of my mouth was correct at that time. But let me tell you, the Islamic Republic had attracted the boys and girls under twenty very much, and they had to return. And the dialect style of Restart is such that it can attract any branch or any group, and it has done this work too. Its sign is now thirty-fourty million, it has over thirty million listeners. This indicates that the program has had no flaws until now. If they could have found one single, two flaws in it, the program would have gone up in the air by now. And I have emphasized this program several times, I emphasize again that it is not mine; these are the thoughts of the Greats of history that I picked from among them and am explaining to you, and we are opening the hands of governments, the faithless, and the religious for you. Just as we explained regarding Democracy, Secularism, and the world doesn't want you to understand the subject at all. Why? Because the government and states are in the hands of a group of people who fully know what Restart means. They all know, all of them. 90 percent of the Presidencies of the world know what Restart is. Right now as the program is broadcasting, the CIA has recorded this program, put people on it, put experts on it. Be sure. It was from Episode Five that we know...

The **KA- GE-BE** has picked this up now, adjusted it, examined it: What do they want to do? What goal do they have? Because it took 700 years for such a program to come out; such a program hasn't come out until now. And for this reason, all the spy organizations of the world are doing this. If you see the BBC doesn't broadcast it... the poor BBC employee is truly wretched too, they can't do anything, their livelihood would be cut off. It has been announced from MI6 basically, this is a direct order. The intelligence organization of the world, do they have anything to say against Restart? They don't. And they know if Restart is broadcast in any language in the world, its regime will change. People will scream and demand answers to questions they haven't had answers to until now, and they cannot answer because they have nothing in their satchel, and everyone will be defeated. The reason basically is that the world is the internet now; they can no longer kill people like Socrates, it's not that simple.

And Restart has done something where by killing a person like Hosseini, Restart's legitimacy reaches a hundred thousand. This is practically no joke anymore, a hundred thousand great laws come into existence in the world. The conclusion of my whole talk is that we put out this program so that, please, Iranian militia member kids, dear Iranian revolutionary guards, ninety percent of whom are in there just so your livelihood passes—and we know this and we love you too. Don't think we consider you similar to Iranian revolutionary guards or Iranian militia members who hit people on the head; not everyone hits people on the head. Many Iranian militia members, when an Iranian militia member hit someone on the head, got upset in the bottom of their hearts. We beg you, instead of going and sticking to the hearsay and these things, listen to this program once, and then recognize the real Muhammad son of Abdullah in this program.

Know once who Moses really is, who Jesus really is. And shake yourself once, do some house-cleaning, shake your heart, and be sure that you won't fail and you won't lose. Be sure that after twenty-thirty programs, your faith in this program will become several times stronger and you will understand the path of religion more, and you will easily understand how one can have the other world. Whether scientific and through wisdom or colloquial. In every language in Restart, this has been expressed. Listen without prejudice and you will realize that the religion of your father and mother is the worst thing that has been transferred to you, and the religion of father and mother is not religion. And the father and mother—the only place where you can stand against them, against father and mother—is regarding religion. And the path of religion is a path that only Restart explains. That's why when you go and look at Philosopher people, principally they are labeled "Faithless". Faithless means they don't know what their religion is and they are confused because the questions are strange. And let me tell you that governments also make their efforts to take you out of the correct path of this Philosopher's thoughts. Just as you look at Restart, they were mocking it just the same, now the number is so high that they can't say forty million are idiots who... they understand. Meaning he says "The Iranian militia member is listening, the Iranian revolutionary guards is listening, he's confused." The Ministry of Intelligence is confused too; they can't anymore. We have passed a border where they can no longer mock us. Now they say, "He brought a new religion." First they said "Dr. Shariati came," then they said "Khomeini came," now they say "No no no, this one is very smart, he is God. He knows how... he made something that no one can reach." Now they said "He is smart." But he is lying, he is smart but he is twisting it!

Now this border is crossed, slowly they say, "Sir, it's true, their words are true," and men and women in Restart are only equal. Remember this. In all religions and among the faithless, woman is a waste/dreg that you must spit on in the street. Only in Restart are men and women equal. And "Man" means only the **Complete Human** and the Sufis. And "Woman" means you and I who are listening to this program. These were also terms that existed in Restart and many other things. You will understand the concept of Wine and Goblet and these things in Restart, just as in the book (*West-Eastern Diwan*), His Excellency Mr. Goethe did not remove the word "Allah." That same word "Allah" is in it in a way. Nightingale and Cupbearer and Dervish and Houri and Musk and these are all in it. Why? Because there is a message in it that he cannot talk about. And Restart loves all (Unity of being believers) and holds respect for them and guides you toward the Sufis who are around a being named the **Complete Human** with wisdom and thought. So if you understand this program, know Restart without philosophy. Be sure of knowledge, it is impossible that you are not wise and you understand this program. But after a few programs... right now you are listening to Zero. If after a few programs you couldn't listen to the rest, be sure that you do not have a wisdom-based attitude. Meaning you cannot be a scientist, you cannot be a professor, you cannot be a philosopher, you cannot be a great person who serves your country. Why? Because you have hidden your wisdom entirely in the storage room and hid it back there and you are an imitator and accepted whatever they told you. You are not influential; you have been influenced. And for this reason, you cannot raise your head in society and say "I understand" or "I am thinking." Because thought starts from a question, and the answer to this question in the Universe, they name it "Philosopher." Meaning they explain

the attitude of the Universe to you. Thanks for listening to this program. Until the next Restart program, as per the usual routine, farewell.
